

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

## NOTICE.

---

The present Volume contains a series of Returns made by the Railway Companies to Inquiries addressed to them by the Commission.

The inquiries were arranged under nine heads, viz. :—

Nos. 1, 2, 3, contained questions in regard to Railway Charges for the Carriage of various kinds of goods, and the Conditions applicable thereto.

No. 4 asked for a List of the Acts of Parliament under which Rates and Tolls were levied.

No. 5 contained inquiries as to Passenger Fares ;—

No. 6 as to the Rates for Parcels ;—

No. 7 as to the Charges for Horses, Carriages, and Dogs by Passenger Trains ; and,

No. 8 as to the Charges for Live Stock by Goods Trains.

No. 9 was for the purpose of comparing the present Rates and Charges with those levied on the same lines about 10 and 25 years ago respectively.

<sup>1</sup> In fixing the rates and charges regard is had to the local circumstances, the nature and value of the article to be carried, the existence and extent of competition by sea or by inland navigation or otherwise, between the same or neighbouring places, and also to the rates and charges from other producing districts to the same market.  
The minimum rate in this column includes all charges and terminals, but such minimum is modified in special cases, according to circumstances.

<sup>2</sup> The mileage charge stated in these columns (b.) is in all cases in addition to the before-mentioned minimum.

3. Are the above mileage charges uniformly applied between all stations on your system of railways?  
4. If not, state the nature of the exceptions?

No; they are modified according to circumstances.

Traders finding their own sidings, shunting and marshalling their own trucks into trains, sending full train loads at one time, &c., &c., &c.  
At owner's risk.

5. Is the traffic of this class conveyed at the owner's risk, or otherwise?  
6. If not, state in what respects you depart from this condition?

See answer to No. 5.

7. Do you undertake to deliver this class of traffic within a specified time?

No.

8. What time is allowed at the stations for loading and unloading this class of traffic?

A reasonable time for loading, according to the nature of the traffic, and two clear days for unloading.

9. What charge do make for demurrage of waggons?

Three shillings per waggon per diem after two clear days.

London and North-western Railway.—Inquiry No. 1.—*continued.*

## (B.) IN OWNERS' WAGGONS.

10. State in the following Table, the charges on your own line for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement:—

Name of Article.	(a.)			(b.)		(c.)	
	What is the Minimum Charge per Ton for each Article for the shortest Distance?	What is the Minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 50 Miles?	What is your Scale of Charges according to Distance for Distances beyond 50 Miles?	What is the Charge per Ton for Terminal or Station Accommodation?	Is it included in the foregoing Charges.
Bricks, common Cannel Chromate ores Cinders Clay Coal Coke Compost Coprolites, for manure Culm Draining pipes and tiles (com. for agricultural draining). Dross Fire bricks and clay Flagstones Granite, undressed Gravel Iron ore Iron, pig Iron stone Lime and limestone Manure, in bulk Materials for road repairs Peat Potters' earth Pyrites Salt, rock, and unmanufactured Salt, in bulk, including manufactured salt, when so carried. Sand Scoria Slag Slates, common Stone, in the rough state, building, pitching, paving, kerb, or flags. Sulphur ore Tiles Turf Zinc ore	See note 1 to the Table above.—The public very rarely, if ever, find waggons for this traffic, but if they did, we should make an allowance of about $\frac{1}{4}$ d. per ton per mile for so doing.  Varies from 6d. to 1s.  Same as coal.  The public rarely find waggons for this traffic. In cases where private waggons are used an allowance special to each case is agreed on. One-eighth of a penny per ton per mile is a common allowance.  <						

10d. Do the charges include returning empty waggons?

11. Are the above charges uniformly applied between all stations on your system of railways?

12. If not, state the nature of the exceptions?

13. Is the traffic of this class conveyed at the owner's risk, or otherwise?

14. Do you undertake to convey this class of traffic within a specified time?

15. And to return the empty waggons within a specified time? And if so, in what time?

16. Do you allow demurrage on owners' waggons when not returned within the specified time?

Yes.

No. They vary according to circumstances (see special note in preceding page).

See answer to No. 4.

At owner's risk.

No.

No. The waggons are conveyed and returned in the same time and by same trains as the company's waggons, and are otherwise treated in transit the same as the company's waggons.

No.

## FOR THROUGH TRAFFIC, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

17. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions?

Yes, with all companies willing to book through.

18. Are junctions considered as stations for this class of traffic?

Not always, but generally as places for interchange of through traffic.

19. If not, state the exceptions?

When there is no station there.

20. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

Traffic is handed in the same wagon to the next company for forward transit, without delay or trans-shipment, except in cases of break of gauge.

## CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

21. Have you any scale of charges applicable to contracts? If so,—

No.

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

22. Have you any special contracts independent of the foregoing scale of charges or conditions?

No.

London and North-western Railway—continued.

INQUIRY No. 2.—Questions in regard to Railway Charges.

FOR ARTICLES CARRIED FROM STATION TO STATION ONLY, OR FROM JUNCTION TO JUNCTION ONLY, ON ALL YOUR LINES, IN COMPANIES' WAGGONS.

1. State in the following Table the charges on your lines for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement :—

Name of Article.	(a.)			(b.)		(c.)		(d.)		
	What is the minimum Charge per Ton for each Article for the shortest Distance?	What is the minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 50 Miles?	What is your Scale of Charges according to Distance for Distances beyond 50 Miles.	What is the Charge per Ton for Terminal or Station Accommodation?	Is it included in the foregoing Charges?	What is the Charge for Loading and Unloading when done by the Company?	Is it in addition to the foregoing Charges?	Is any and what Deduction made when the Loading or Unloading is done by the Owner?
For the whole of the articles included in the Special Class of the Clearing House Classification. Appendix C.	Two shillings per ton in a few instances, but generally from 3s. to 4s. per ton.	Generally two tons, but in special cases one ton.	Six miles.	From 14d. to 24d. per ton per mile generally, but lower rates than these are sometimes charged to meet special cases.	From 1d. to 2d. per ton per mile generally, but lower rates are made to meet special cases.	Generally from 1s. 6d. to 2s. 6d. per ton at each end, and is not included in the two previous columns.		No separate charge is made, as these services are included in the terminal.		No, except in the case of private sidings, when the loading or unloading is done by the owner of the sidings, in which cases an allowance is made by agreement.

2. Are the above mileage charges uniformly applied between all stations on your system of railways? } No; the charges vary according to circumstances; competition both by rail and by water; the distance between the manufactory and the markets; and the general development of traffic to encourage it to come on to the line.
3. If not, state the nature of the exceptions, and give an instance of each class of exceptions. }
4. Is the traffic of articles in this return conveyed at the owner's risk, or otherwise? } Principally at company's risk; certain articles are carried at owner's risk, when a lower rate is charged to the public.
5. If not, state in what respects you depart from this condition. }
6. Do you undertake to deliver the traffic of articles in this return within a specified time? } No specific time agreed upon; but generally, in practice, from 24 hours to 48 hours, except in very long distances.
7. What time is allowed at the stations for loading and unloading this class of traffic? } Twenty-four to 48 hours are allowed.
8. For what period do you keep any of the articles in this return in your warehouses free of charge? } This class of traffic is not, as a rule, warehoused; the scale of warehousing charges varies in different districts, and according to the cost of service and accommodation rendered.
9. What charge for warehousing is made after the period has expired? } Three shillings a day.
10. What charge do you make for demurrage of waggons?

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions. } This company do so under agreements with the other companies.
12. Are junctions considered as stations for the traffic of articles in this return? } Not as stations, but as places of interchange when entered at through rates, but if it is booked to the junction, then, for the purpose of forward transit, the junctions become booking stations.
13. If not, state the exceptions, and give an instance of each class of exception. }
14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given? } Local rates are charged to the junction where the traffic is handed over to the other company, who carry it forward at their local rates, but such cases are very exceptional.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,— } No.
- a. Is the charge based on a minimum annual payment, or on the quantity carried? } No.
- b. Or how otherwise? } No.
16. Have you any special contracts independent of the foregoing scale of charges or conditions? } No.
17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions. } Not always by the shortest route; the company have several routes between the same stations on their system, and they classify the traffic so as to work it conveniently and carry it to its destination in the shortest time; for instance, Liverpool and Manchester, London and Manchester, London and Liverpool, Birmingham and Wolverhampton.

London and North-western Railway.—Inquiry No. 2.—*continued.*

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

Yes; the shortest route on our own line.

19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars.

Yes; salt, gas-tar, sanitary tubes, pit or prop wood.

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

4. Is the traffic of these articles carried at the company's risk (excepting the articles otherwise specified)?

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

7. What time is allowed at the stations for loading and unloading this class of traffic?

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

9. What charge for warehousing is made after the period has expired?

10. What charge do you make for demurrage of waggons?

No; the charges vary according to circumstances; competition, both by rail and by water; the distance between the manufactory and the markets; and the general development of traffic to encourage it to come on to the rail.

Principally at company's risk; certain articles are carried at owner's risk, when a lower rate is charged to the public.

No specific time agreed upon; but generally, in practice, from 24 hours to 48 hours, except in very long distances. From 24 to 48 hours are allowed.

The scale of warehousing charges varies in different districts, and according to the cost of service and accommodation rendered.

Three shillings per day.

## FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

12. Are junctions considered as stations for the traffic of articles in this return?

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

This company do so under agreements with the other companies.

Not as stations, but as places of interchange when entered at through rates, but if it is booked to the junction, then, for the purpose of forward transit, the junctions become booking stations.

Local rates are charged to the junction where the traffic is handed over to the other company, who carry it forward at their local rates, but such cases are very exceptional.

## GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

No.

No.

No.

London and North-western Railway.—Inquiry No. 3.—*continued.*

16. Have you any special contracts independent of the foregoing scale of charges or conditions?

17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars.

A special arrangement exists with the brewers at Burton as to the carriage of beer.

Not always by the shortest route; the company have several routes between the same stations on their system, and they classify the traffic so as to work it conveniently and carry it to its destination in the shortest time; for instance, Liverpool and Manchester, London and Manchester, London and Liverpool, Birmingham and Wolverhampton.

Yes; the shortest route on our own line.

No.

Are market tickets issued? If so, between what places, and at what proportion of the single fares?

Market tickets are issued only to one or two points, such as Wolverton. The charge for the double journey is about a single fare, with 10 per cent. added.

Give the average speeds of trains as follows :—

Average speed of express trains, including stoppages	—	—	—	—	36½ miles per hour.
„ „ ordinary passenger trains	—	—	—	—	28½ „
„ „ parliamentary	—	—	—	—	19½ „

Give some general information as to the nature and extent of your special excursion traffic, stating the frequency of the excursion trains, the places between which they run, the fares charged per mile for each class, the number of passengers of each class generally carried in each train, and the average speed, including stoppages.

Excursion trains have been run from London to the provinces, and from the provinces to London about once every three weeks during the summer months from June to October.

London and North-western Railway.—Inquiry No. 5.—*continued.*

Excursion trains are also run from the manufacturing districts of Lancashire, Yorkshire, Staffordshire and Warwickshire to the coast of North Wales every Saturday during the summer season at low fares, the tickets being available for return on the following Monday.

At general holidays, such as Easter and Whitsuntide, cheap trains are run for the accommodation of the working classes to and from all the principal towns on the system; the period of time for which the tickets by these cheap trains are available varies from two to five days.

Similar facilities are afforded (in the respective districts affected) on the occasion of many of the annual provincial gatherings, such as Chester, Northampton, or Shrewsbury Races, Birmingham Cattle Show and Onion Fair, Buxton Well Dressing, the Welsh Eisteddfod; and some of the more important fairs and anniversaries, to which day-trips as well as excursions allowing a longer period are run.

The scale of charges adopted varies in certain localities, but as a general standard the following has been the basis of calculation:—

	1st Class Carriages.	Covered Carriages. (2nd or 3rd Class.)
For excursions allowing one to five days for return - - -	$\frac{3}{4}$ ths of a penny per mile for the double journey.	$\frac{3}{4}$ ths of a penny per mile for the double journey.
For excursions allowing longer periods up to three weeks for return -	Single 1st class fare - -	Single 3rd class fare.

Another class of excursions is that run for the conveyance of school parties. It consists of day-trips run at very low fares on the occasion of the annual treats given to such schools by the teachers, who generally take their scholars out to some place of attraction in the country, for distances varying from 10 to 50 miles away from their place of residence; the promoters generally add a small sum per head to the fare quoted by the railway company for the purpose of covering the incidental expenses of the party.

Similar arrangements are made for the conveyance of parties of "mill hands" and other operatives, for distances of 30, 40, or 50 miles, the scale of fares adopted being slightly in excess of the charges for the conveyance of school parties.

The average speed of excursion trains, including stoppages, is about 25 miles per hour, and the average number of passengers conveyed by such trains is 436.

## INQUIRY No. 6.—As to Rates for Parcels.

Give, in reference to the lines included in your former returns, the general rates charged for parcel traffic, both by passenger and goods trains, according to weight and distance. Also add particulars of any important exceptions made to these general rates.

What is the rate of insurance on horses exceeding the above-mentioned values?

Five per cent. on declared value above 50*l.* per horse.

State whether the rates charged for this kind of traffic are uniform, or if they are lower for the longer distances. If the latter, give the scale of distances and charges.

The rates are uniform.

**INQUIRY No. 8.—As to Charges for Live Stock by Goods Trains.**

Name the stations between which the highest rates for the conveyance of live stock are charged, showing the charge for each description, and the distances between the stations.

The scale is a uniform one and applies to the whole of the system so that the cattle rates are equal at all parts excepting where from competition by sea or otherwise reduced rates are necessary; for instance, the rate from Aberdeen to London is 6*l.* per waggon, and the distance being 540 miles, the receipts only yield 2½*d.* per waggon per mile. Again, in consequence of the competition by sea from the Dumfriesshire district our rates from that part to Liverpool yield only 3*d.* per waggon per mile; these two cases show the lowest rates in force over the London and North-western Company's system.

Name the stations between which the lowest rates for the conveyance of live stock are charged, showing the charge for each description, and the distances between the stations.

See previous remarks.

Is there any special charge for cattle to the Royal Agricultural Society's shows? If so, state it.

Stock going to the Royal Agricultural Society's shows is charged the full rate, but if it remains unsold and the *bond fide* property of exhibitor it is conveyed home free, viz., returned to the station at which it was received.

## INQUIRY No. 9.—As to Charges at different Periods.

Give, for the lines included in your former return, the information in the annexed table, attending to the following conditions:—

The amounts are to represent the average rates charged per mile.

For goods they are to be the rates for long distances, and including terminal charges.

In the cases of railways opened since 1840 or 1850, give the rates at the time of opening, and substitute this date at the top of the column.

3. Are the above mileage charges uniformly applied between all stations on your system of railways?

4. If not, state the nature of the exceptions.

No, there are numerous exceptions, in which the rates are below these mileage charges.

The exceptions arise from various causes, and the special circumstances in each case are considered with due regard on the one hand to the rate which the traffic will bear, and on the other to what it may be carried at without absolute loss to the company; for instance, traffic is frequently carried at low rates in waggons which would otherwise have to return empty to the station from whence they were originally sent laden with traffic at ordinary rates.

5. Is the traffic of this class conveyed at the owner's risk, or otherwise?

Owner's risk.

6. If not, state in what respects you depart from this condition.

7. Do you undertake to deliver this class of traffic within a specified time?

No.

8. What time is allowed at the stations for loading and unloading this class of traffic?

A reasonable time for loading, and it is generally understood that 24 hours are allowed for unloading.

9. What charge do you make for demurrage of waggons?

3s. per day after the second day, but the rule is not rigidly enforced.

10d. Do the charges include returning empty waggons?

11. Are the above charges uniformly applied between all stations on your system of railways?

12. If not, state the nature of the exceptions.

13. Is the traffic of this class conveyed at the owner's risk, or otherwise?

14. Do you undertake to convey this class of traffic within a specified time?

15. And to return the empty waggons within a specified time?

And if so, in what time?

16. Do you allow demurrage on owners' waggons when not returned within the specified time?

Yes.

No, there are numerous exceptions in which the rates are below these mileage charges.

The exceptions arise from various causes, and the special circumstances in each case are considered with due regard on the one hand to the rate which the traffic will bear, and on the other to what it may be carried at without absolute loss to the company; for instance, coal and stone in full loads is generally carried at lower than the ordinary rates when intended for shipment at a port.

Yes.

No.

No, but we work them in the same manner as our own waggons.

No.

## FOR THROUGH TRAFFIC, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

17. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions?

Yes.

18. Are junctions considered as stations for this class of traffic?

No.

19. If not, state the exceptions.

When the traffic is carried at through rates.

20. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

The traffic is generally conveyed by one company to the point of junction with the other company's line, each company making its own local charge to the public.

## CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

21. Have you any scale of charges applicable to contracts? If so,—

No.

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

22. Have you any special contracts independent of the foregoing scale of charges or conditions?

No.

Lancashire and Yorkshire Railway—continued.

INQUIRY No. 2.—Questions in regard to Railway Charges.

FOR ARTICLES CARRIED FROM STATION TO STATION ONLY, OR FROM JUNCTION TO JUNCTION ONLY, ON ALL YOUR LINES, IN COMPANIES' WAGGONS.

1. State in the following Table the charges on your lines for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement:—

Name of Article.	(a.)			(b.)		(c.)		(d.)		
	What is the Minimum Charge per Ton for each Article for the shortest Distance?	What is the Minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 50 Miles?	What is your Scale of Charges according to Distance beyond 50 Miles?	What is the Charge per Ton for Terminal or Station Accommodation?	Is it included in the foregoing Charges?	What is the Charge for Loading and Unloading when done by the Company?	Is it in addition to the foregoing Charges?	Is any and what Deduction made when the Loading or Unloading is done by the Owner?
For the whole of the articles included in the SPECIAL CLASS of the Clearing House Classification. Appendix CP.	The ordinary minimum charge is 3s., but in numerous instances it is lower.	Two tons is the ordinary minimum, but in many cases this is not enforced; for instance, in the case of corn millers and maltsters who are in the habit of sending large quantities over our line.	Six miles and under.	The general charge is 2d. per ton per mile, but there are numerous cases in which less is charged.	2d. per ton per mile, but in numerous cases it is less.	The general charge is 1s. 8d. per ton at each end, but in numerous cases it is less.	The terminal charge is in addition to the rate per ton per mile.	No separate charge is made. These services are usually performed by the company.	It is included in the terminal charge.	Seldom, the rule being for the company to do the work, but in some cases an allowance is made in fixing the rate to meet special circumstances, such as in the case of parties owning private sidings.

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

4. Is the traffic of articles in this return conveyed at the owner's risk, or otherwise?

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

7. What time is allowed at the stations for loading and unloading this class of traffic?

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

9. What charge for warehousing is made after the period has expired?

10. What charge do you make for demurrage of waggons?

No, there are numerous exceptions, the company being generally guided by what will develop the traffic and by local circumstances.

Through traffic, long distances, low-priced articles which will not bear the full rates; sea competition, such as Liverpool and Glasgow, and Liverpool and Hull for the continent.

Generally at the company's risk.

By special arrangement, and some articles, such as chimney tops, made from fire-clay, are considered as carried at owner's risk.

No, but consignees are advised by post or messenger when the goods arrive at the station, and are requested to remove them as early as possible.

A reasonable time; generally 24 hours.

Our practice is not uniform, but in no instance do we commence to charge until two days have elapsed. At some stations we allow a fortnight, some a month, some two months, and in numerous instances an indefinite period, without any charge.

Upon grain and flour at stations where a charge is made it is ½d. per sack, and from ½d. to 1d. per quarter per week, but at numerous stations no charge is made for these or any other articles.

3s. per waggon per day.

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

12. Are junctions considered as stations for the traffic of articles in this return?

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

Yes, by mutual arrangement, and between such places as appear from time to time to be necessary for the public convenience.

Yes, when the traffic is not carried at through rates, but this is seldom the case.

When the traffic is carried at through rates.

The traffic is carried at local rates, and consignments of two tons and upwards are sent through in the waggons in which they have been carried to the junction.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

16. Have you any special contracts independent of the foregoing scale of charges or conditions?

No.

No.

Lancashire and Yorkshire Railway.—Inquiry No. 2.—*continued.*

17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

19. Are any articles in this class ever carried in owners' waggons? If so, state the particulars.

Yes, as a general rule, but as the shortest route is not always the most convenient, or easy to work in consequence of severe gradients, and for other reasons, it is not uniformly adopted.

Yes, the shortest route governs the rate.

Yes, occasionally propwood and stores for colliery proprietors, gas coal tar, and sanitary tubes.

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

No, there are numerous exceptions, the company being guided by what will develop the traffic, and by local circumstances.

Lancashire and Yorkshire Railway.—Inquiry No. 3.—*continued.*

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

Through traffic, long distances, low-priced articles which will not bear the full rates; sea competition, such as Liverpool and Glasgow, Liverpool and Hull, for the continental traffic.

Yes, generally.

4. Is the traffic of these articles carried at the company's risk (excepting the articles otherwise specified)?

By special arrangement.

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

No, but we make arrangements for its being as expeditiously delivered as possible.

7. What time is allowed at the stations for loading and unloading this class of traffic?

These services are performed by the company as expeditiously as possible.

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

Our practice is not uniform, but in no instance do we commence to charge until two days have elapsed; at some stations we allow a fortnight, some a month, some two months, and in numerous instances an indefinite period, without any charge.

9. What charge for warehousing is made after the period has expired?

Varies from 1*d.* to 3*d.* per week for small packages, and from 3*d.* to 6*d.* per ton per week for general merchandise; but at a large number of stations no charge is made.

10. What charge do you make for demurrage of waggon?

None, the company themselves performing the services of loading and unloading.

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

Yes, by mutual arrangement, and between such places as appear from time to time to be necessary for the public convenience.

12. Are junctions considered as stations for the traffic of articles in this return?

Yes, when traffic is not carried at through rates, but this is not frequently the case.

13. If not, state the exceptions, and give an instance of each class of exception.

When traffic is carried at through rates.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

The traffic is carried at local rates, and consignments of a ton and above are forwarded in the waggon in which they have been carried locally to the point of junction; smaller lots are transferred from the waggon of one company to the other company's waggon.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

No.

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

16. Have you any special contracts independent of the foregoing scale of charges or conditions?

No.

17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.

Yes, as a general rule, but as the shortest route is not always the most convenient, or easy to work in consequence of severe gradients, and for other reasons, it is not uniformly adopted.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

Yes, the shortest route governs the rate.

19. Are any articles in this class ever carried in owners' waggons? If so, state the particulars.

Yes, occasionally stores for colliery proprietors.

INQUIRY No. 4.—As to Acts of Parliament authorizing Tolls and Rates.

Give a list of the Acts of Parliament now in force, under which you are authorized to levy tolls and rates on the lines included in your former return.

The tolls and rates charged by this company are authorized by "The Lancashire and Yorkshire and East Lancashire Railways Amalgamation Act, 1859." [22 & 23 Vict. c. 110.]

Are market tickets issued? If so, between what places, and at what proportion of the single fares?

Very few market tickets are issued; those in operation are charged about one single fare, and a fourth for the double journey.

Give the average speed of trains as follows:—

Average speed of express trains, including stoppages	-	-	-	-	34 miles per hour.
" " ordinary passenger trains	-	-	-	-	22 "
" " parliamentary	-	-	-	-	18 "

Give some general information as to the nature and extent of your special excursion traffic, stating the frequency of the excursion trains, the places between which they run, the fares charged per mile for each class, the number of passengers of each class generally carried in each train, and the average speed, including stoppages.

These trains are run during the summer months to watering places, and other places of special attraction.

In the year 1865 we carried 530,228 passengers in excursion trains.

These trains are run about twice weekly between each of the principal places of attraction.

The fares vary from ¼th to ¾ths of a penny per passenger per mile run.

The general rule on this line is to run third class or covered carriages only by excursion trains.

The average speed of the trains is about 18 miles an hour.

## INQUIRY No. 6.—As to Rates for Parcels.

Give, in reference to the lines included in your former returns, the general rates charged for parcel traffic, both by passenger and goods trains, according to weight and distance. Also add particulars of any important exceptions made to these general rates.

Parcels by passenger train are charged according to the following scale, there being no important exceptions from it:—

GREAT NORTHERN RAILWAY.—RATES FOR CARRIAGE OF COAL AND COKE, FROM 1ST MARCH 1863.

1. These rates are for coal and coke in owners' waggons. Twenty-one cwt. will be allowed to the ton. If the Company provide waggons 9d. per ton extra will be charged.
2. The Company will find waggons, so far as their waggon stock will permit. Applications for waggons must be addressed to Mr. Newton, Doncaster, and such applications will be registered and duly attended to.
3. One clear day will be allowed from the day on which the waggons are forwarded to the collieries for their return thence to Doncaster. If detained beyond that time, or loaded contrary to the Company's order, the Company reserve the right of charging the collieries demurrage at the rate of 3s. per day. Demurrage will also be charged to the consignees, at the Stations, at the same rate, if the waggons remain loaded above two clear days from their arrival at the Station to which they are consigned, Sundays in both cases excepted.
4. The Company reserve the right of charging siding accommodation when owners' waggons stand loaded at the receiving Stations above one clear day, Sundays excepted.

## (B.) IN OWNERS' WAGGONS.

10. State, in the following table, the charges on your own line for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement :—

Same as (A). For drawback allowed on private waggons, see circular below.

(Circular.)

London, May 1st, 1861.

It is determined that, when private waggons are used, an allowance of one farthing *per truck per mile* for the distance run on the Great Northern system be made to the owners, provided that every such truck contains not less than three tons, or that weight to be paid for.

The Company's full rates will be charged, and the claims for waggon hire must be sent periodically to the clerk at the sending station, who will check and certify if correct.

By order of 15th May [1861]. The allowance must not be made on trucks containing cinders, coal, coke, or culm except when such traffic is invoiced through the goods department.

- |  |                                  |
|--|----------------------------------|
| 10d. Do the charges include returning empty waggons?   | Yes.                             |

| b. Or how otherwise?  |  |
| 22. Have you any special contracts independent of the foregoing scale of charges or conditions? | Yes; a few with owners of private brick fields or sidings, &c. |

## INQUIRY No. 2.—Questions in regard to Railway Charges.

## FOR ARTICLES CARRIED FROM STATION TO STATION ONLY, OR FROM JUNCTION TO JUNCTION ONLY, ON ALL YOUR LINES, IN COMPANIES' WAGGONS.

1. State in the following Table the Charges on your lines for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement :—

Name of Article.	(a.)			(b.)		(c.)		(d.)		
	What is the Minimum Charge per Ton for each Article for the shortest Distance?	What is the Minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 50 Miles?	What is your Scale of Charges according to Distance for Distances beyond 50 Miles?	What is the Charge per Ton for Terminal or Station Accommodation?	Is it included in the foregoing Charges?	What is the Charge for Loading and Unloading when done by the Company?	Is it in addition to the foregoing Charges?	Is any and what Deduction made when the Loading or Unloading is done by the Owner?
For the whole of the articles included in the SPECIAL CLASS of the Clearing House Classification. Appendix C <sup>p</sup> .	1s. 6d. to 2s. 6d.	Two tons.	Six miles.	Mileage rates, but these rates are on the average below the minimum allowed by the Act.		Various, according to circumstances.	The terminal charges are in addition to the mileage rates.	The rule is for the loading and unloading of station to station traffic to be performed by sender and consignee, but the Company's men assist.		

Great Northern Railway.—Inquiry No. 2.—*continued.*

2. Are the above mileage charges uniformly applied between all stations on your system of railways?
3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.
4. Is the traffic of articles in this return conveyed at the owners' risk, or otherwise?
5. If not, state in what respects you depart from this condition.
6. Do you undertake to deliver the traffic of articles in this return within a specified time?
7. What time is allowed at the stations for loading and unloading this class of traffic?
8. For what period do you keep any of the articles in this return in your warehouses free of charge?
9. What charge for warehousing is made after the period has expired?
10. What charge do you make for demurrage of waggons?

No, the charges vary according to circumstances.

Exceptional cases are very numerous to meet sea competition, as, for instance, the rates between Liverpool and London.

Generally at Company's risk.

Goods in higher classes are charged at special class rates on the undertaking of the owner to bear the risk.

No.

Not exceeding 48 hours, after which demurrage is charged.

Various according to the nature of the traffic and locality of the station.

Ditto.

3s. per day.

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

Yes, by mutual arrangement.

12. Are junctions considered as stations for the traffic of articles in this return?

Not when the traffic is entered at through rates.

13. If not, state the exceptions, and give an instance of each class of exception.

When the traffic is carried at local rates up to and from the junction.

14. What arrangements are made for the interchange of traffic with other companies when through charges are not given?

We load and invoice locally to the station nearest to the other company's line, and send the waggons through if the load is two tons and over.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

No, but we have a few special rates for a given annual quantity of traffic applicable to all parties sending the same.

- a. Is the charge based on a minimum annual payment, or on the quantity carried?

- b. Or how otherwise?

Ditto.

16. Have you any special contracts independent of the foregoing scale of charges or conditions?

17. Is the traffic in all cases sent by the shortest railway route in connection with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.

Not always, but the shortest route governs the charge.

The fitting of trains sometimes renders it desirable to send the traffic by a route, the property of the Company, which may be less direct.

Ditto.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars.

Seldom; but salt, sanitary tubes, stone, &c., are at times sent in owners' waggons, and in some cases we make them an allowance for it.

INQUIRY No. 3.—Questions in regard to Railway Charges.

1-6. State in the following Table the Charges for the conveyance of the various articles named, between stations on your own lines, in tons of 2,240 lbs., or the equivalent measurement, including collection and delivery. Specify against any of these articles those which are from station to station only.

Name of Article.	(a.)		(b.)		(c.)	(d.)		(e.)		(f.)	(g.)
	What is the Minimum Charge for Articles under 112 lbs. Weight?	What is the Scale of Charge for Articles under 112 lbs. according to Distance?	What is the Minimum Charge per Ton?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded?	What is the Charge per Ton for Portage and Station Accommodation?	Are these Charges included in the Mileage Rates?	What is the Charge per Ton for Collection and Delivery?	Are these Charges included in the Mileage Rates?	Are there any exceptional Charges for Collection and Delivery? If so, state the Stations and Charges.	Are any of these Articles carried upon Toll, and, if so, at what Rates?
For the whole of the articles included in the First, Second, Third, Fourth, Fifth, and Sixth Classes of the Clearing House Classification. Appendix C.											
Sixpence.											
Our Small Rates by Goods Trains are about as under:—											
	56 lbs.	112 lbs.									
	4. d.	4. d.									
10 to 25 miles	0 9	1 0									
25 to 50 miles	0 9	1 0									
50 to 100 miles	1 0	1 6									
Above 100 miles	1 6	2 0									
4s. 2d.											
Six miles.											
The charges are not regulated solely according to distance, but are governed by the special circumstances of each case and with reference to the Company's powers, and are only such as will fairly remunerate the Company for their capital and current expenditure.											
1s. 6d. per ton and upwards at each end, according to the class of goods.											
Not in the mileage, but in the gross rate charged.											
In London, 3s. to 7s. 6d.; and in the country 1s. 8d. to 3s. at each end, excepting for risky and fragile goods.											
Not in the mileage, but in the gross charge.											
Yes, for bulky, heavy, and fragile articles, also for long distances and bad state of roads.											
No.

Great Northern Railway.—Inquiry No. 3.—*continued.*

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

4. Is the traffic of these articles carried at the Company's risk (excepting the articles otherwise specified)?

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

7. What time is allowed at the stations for loading and unloading this class of traffic?

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

9. What charge for warehousing is made after the period has expired?

10. What charge do you make for demurrage of waggons?

There are numerous exceptions to the scale of rates to suit particular markets and districts, and where great competition exists.

Generally at the Company's risk, excepting when provided for in the Carriers' Act, and when goods are charged at lower rates than those specified for the class to which they belong, on the undertaking of the owner to bear the risk.

No, but in a reasonable time.

The goods are delivered by the Company with all possible expedition.

Various, according to the nature of the traffic and locality of the station.

Ditto.

None, as a rule, the goods being usually unloaded by the Company and warehoused.

## FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

12. Are junctions considered as stations for the traffic of articles in this return?

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies when through charges are not given?

Yes, by mutual arrangement.

Not when the goods traffic is carried at through rates.

When no through rates exist, and the junction is a transshipping station.

We invoice locally to the station nearest to the other company's line.

## GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

a. Is the charge based on a minimum annual payment, or the quantity carried?

b. Or how otherwise?

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

19. Are any articles in this class ever carried in owners' waggons? If so, state the particulars.

No.

No special contracts, but we have special rates applicable to all parties under like circumstances.

Not always, but the shortest route governs the charge. It is sometimes more convenient and economical to work the traffic by a less direct route.

No.

Give the average speeds of trains as follows :—

	Miles.
Average speed of express trains, including stoppages	40·26 per hour.
„ „ ordinary passenger trains	24·51 „ „
„ „ parliamentary	23·59 „ „

Give some general information as to the nature and extent of your special excursion traffic, stating the frequency of the excursion trains; the places between which they run; the fares charged per mile for each class; the number of passengers of each class generally carried in each train; and the average speed, including stoppages.

We run excursion trains between London and Lancashire, Yorkshire, and Lincolnshire, the extreme points being Halifax, York, Liverpool, Hull, and Grimsby, calling at the principal intermediate stations on an average about every three weeks during the season to and from some or all of these places.

The season begins in June and terminates in September.

We also run similar trains at Whitsuntide and Easter. Day trips are also run to London from Yorkshire and Lincolnshire during the season, and from the Great Northern local districts, in about the same proportion as the above-named.

Extra excursions are sometimes run on the occasion of attractive fêtes in London, at the Crystal Palace, &c.

The running of country excursions is determined by races, galas, fêtes, and various other attractions which occur at almost every place of any note during the season; for such events excursions are usually run from stations within a radius of 75 to 100 miles, depending upon the nature of the attraction.

Doncaster races is an exception, as on that occasion excursions are run from the whole of the Great Northern system.

- Frequency of the excursion trains
- Places between which they run

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

Yes, subject to remarks in columns and margin.

See reply to No. 2.

Midland Railway.—Inquiry No. 2.—*continued.*

4. Is the traffic of articles in this return conveyed at the owner's risk, or otherwise? Generally at the company's risk.
5. If not, state in what respects you depart from this condition. See reply to No. 4, but when the articles are charged at rates in the lower classification they are carried at the owner's risk.
6. Do you undertake to deliver the traffic of articles in this return within a specified time? No.
7. What time is allowed at the stations for loading and unloading this class of traffic? 24 hours as a general rule.
8. For what period do you keep any of the articles in this return in your warehouses free of charge? Articles in this class are not usually warehoused, but when they are the charge or freedom from charge varies according to circumstances.
9. What charge for warehousing is made after the period has expired? See reply to No. 8.
10. What charge do you make for demurrage of waggons? 3s. per day after two clear days, but not strictly enforced.

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions. Yes.
12. Are junctions considered as stations for the traffic of articles in this return? Not on traffic charged through.
13. If not, state the exceptions, and give an instance of each class of exception. See reply to No. 12.
14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given? The local charges are made in such cases, and particulars of the charges handed to the company who have to carry forward the goods.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,— No.
- a. Is the charge based on a minimum annual payment, or on the quantity carried? See reply to No. 15.
- b. Or how otherwise? See reply to No. 15.
16. Have you any special contracts independent of the foregoing scale of charges or conditions? No.
17. Is the traffic in all cases sent by the shortest railway route in connection with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions. Yes, unless a longer route is found in practice to be more convenient.
18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply. Yes.
19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars. A very rare event.

" " ordinary passenger trains, " " - - -	-	-	-	25½ "
" " parliamentary " " - - -	-	-	-	20 "

Give some general information as to the nature and extent of your special excursion traffic, stating the frequency of the excursion trains, the places between which they run, the fares charged per mile for each class, the number of passengers of each class generally carried in each train, and the average speed, including stoppages.

There is a large excursion traffic on the Midland Railway during the summer months to watering places, large towns, and other places which offer attractions to the general public.

Midland Railway.—Inquiry No. 5.—continued.

The frequency of these trains depends upon circumstances. The following trains were run during the summer months of 1865 :—

	1865.	Local Excursion Trains.	Excursion Trains to other Company's Lines.
June - - -	-	124	48
July - - -	-	141	80
August - - -	-	144	91
September - - -	-	114	63
October - - -	-	36	26
		559	308
Gross total - -	-	867	

The fares vary according to distance and circumstances, being frequently as low as  $\frac{1}{2}d.$  first class, and  $\frac{1}{2}d.$  covered carriages per mile run.

In 1865 the following local excursion trains were run :—

	No. of Trains.	Number of Passengers.		
		1st Class.	In covered Carriages.	Total.

Is there any special charge for cattle to the Royal Agricultural Society's shows? If so, state it.

Cattle to the Royal Agricultural show is charged the full rates, but is returned free if it remains the *bond fide* property of the original sender.

The same facilities are given to other agricultural shows on the application of the secretary.

## INQUIRY No. 9.—As to Charges at different Periods.

Give, for the lines included in your former returns, the information in the annexed table, attending to the following conditions:

The amounts are to represent the average rates charged per mile.

For goods they are to be the rates for long distances, and including terminal charges.

In the cases of railways opened since 1840 or 1850, give the rates at the time of opening, and substitute this date at the top of the column.

The term "long distances" in this return is assumed to mean more than 100 miles.

3. Are the above mileage charges uniformly applied between all stations on your system of railways?

4. If not, state the nature of the exceptions.

5. Is the traffic of this class conveyed at the owner's risk, or otherwise?

6. If not, state in what respects you depart from this condition.

7. Do you undertake to deliver this class of traffic within a specified time?

8. What time is allowed at the stations for loading and unloading this class of traffic?

9. What charge do you make for demurrage of waggons?

No; there are some few exceptions.

Less rates are charged at points competitive with water conveyance, principally the Thames.  
Generally at owner's risk.

No.

One day for loading; and until noon of the day after arrival (say about 30 hours from time of arrival) for unloading.

## FOR THROUGH TRAFFIC, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

17. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions?

We do in most cases.

18. Are junctions considered as stations for this class of traffic?

Yes ; our junctions with other companies' lines are all stations.

19. If not, state the exceptions?

20. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

The waggons run through whenever practicable, although the charges may not always be made throughout.

## CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

21. Have you any scale of charges applicable to contracts? If so,—

a. Is the charge based on a minimum annual payment, or on the quantity carried?

Generally on the quantity carried.

b. Or how otherwise?

22. Have you any special contracts independent of the foregoing scale of charges or conditions?

Yes.

## FOR THROUGH TRAFFIC.

11 Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

We do in most cases.

12. Are junctions considered as stations for the traffic of articles in this return?

Yes, our junctions with other lines are all stations.

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

The waggons run through whenever practicable, although the charges may not always be made throughout.

## GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

a. Is the charge based on a minimum annual payment, or on the quantity carried?

Generally on the quantity carried.

b. Or how otherwise?

Yes.

16. Have you any special contracts independent of the foregoing scale of charges or conditions?

Yes, generally by the shortest route.

17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

Yes, as a rule.

19. Are any articles in this class ever carried in owners' waggons? If so, state the particulars.

Very rarely so. (Salt is an exception.)

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

Yes, generally so.

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

4. Is the traffic of these articles carried at the company's risk (excepting the articles otherwise specified)?

Yes.

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

No.

7. What time is allowed at the stations for loading and unloading this class of traffic?

Generally two days or thereabouts.

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

It depends upon circumstances.

9. What charge for warehousing is made after the period has expired?

Ditto.

10. What charge do you make for demurrage of waggons?

3s. or 5s. per waggon per day according to circumstances.

## FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

We do in most cases.

12. Are junctions considered as stations for the traffic of articles in this return?

Yes; our junctions with other lines are all stations.

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

The waggons run through whenever practicable, although the charges may not always be made throughout.

South-eastern Railway.—Inquiry No. 3.—*continued.*

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—  
*a.* Is the charge based on a minimum annual payment, or on the quantity carried? Generally on the quantity carried.  
*b.* Or how otherwise? Yes.  
 16. Have you any special contracts independent of the foregoing scale of charges or conditions? Yes; generally by the shortest route.  
 17. Is the traffic in all cases sent by the shortest railway route in connection with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.  
 18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply. Yes, as a rule.  
 19. Are any articles in this class ever carried in owners' waggons? If so, state the particulars. No.

# NORTH-EASTERN RAILWAY.

## INQUIRY No. 1.—Questions in regard to Railway Charges.

1. Give a list of the lines to which this return refers, and state their respective lengths

THE NORTH-EASTERN RAILWAY.  
The length of the North-eastern Railway is 1,115 miles, exclusive of the line from Methley Junction to Leeds (9 miles), which belongs to the Midland Company, and over which the North-eastern Company run their trains.

FOR ARTICLES CARRIED FROM STATION TO STATION ONLY, OR FROM JUNCTION TO JUNCTION ONLY, ON ALL YOUR LINES.

(A.) IN COMPANIES' WAGGONS, WHEN LOADED AND UNLOADED BY THE OWNERS.

2. State in the following Table the charges on your lines for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement:—

Name of Article.	(a.)			(b.)		(c.)		(d.)	
	What is the Minimum Charge per Ton for each Article for the shortest Distance?	What is the Minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 50 Miles?	What is your Scale of Charges according to Distance for Distances beyond 50 Miles?	What is the Charge per Ton for Terminal or Station Accommodation?	Is it included in the foregoing Charges?	What is the Charge for Loading and Unloading when done by the Company?	Is it in addition to the foregoing Charges?
Bricks, common	1s. 3d.	4 tons	Usually from 6 to 8 miles, but in some special cases to a considerably greater distance.	2½d. to 1½d.	1½d. to ¾d.	For the articles mentioned in this return no separate charge is made for terminal accommodation or services, this being included in the scale of charges. The amount which may be taken to represent the terminal charge is therefore only a matter of estimate, and may be assumed at from 6d. to 1s. 6d. per ton.	Yes.	The Company does not load any of this traffic. They occasionally unload, making no charge except in some very rare instances, where by a special arrangement with consignees a charge of from 3d. to 6d. per ton is made. \* Under very exceptional circumstances in one district a lower rate than 1s. 3d. is taken (viz., 10d. per ton, 5 tons, 4 miles).

### GENERAL REMARKS.

Note as to column (b.)—The charges are not regulated by a mileage scale, nor solely according to distance. Within the limit of the Company's legal powers they are determined by the consideration, in the special circumstances of each case, of what will fairly remunerate the Company for their current and capital expenditure, and of what the traffic is able to bear. The figures, therefore, in column (b.) represent approximately the charges made by the Company, the rates between any two stations depending upon the circumstances of the particular case.

3. Are the above mileage charges uniformly applied between all stations on your system of railways?

With very few exceptions the rates range within the scales of charges given in each column.

4. If not, state the nature of the exceptions.

At the owner's risk.

5. Is the traffic of this class conveyed at the owner's risk, or otherwise?

No.

6. If not, state in what respects you depart from this condition.

Twenty-four hours.

7. Do you undertake to deliver this class of traffic within a specified time?

8. What time is allowed at the stations for loading and unloading this class of traffic?

Three shillings per waggon per day.

9. What charge do you make for demurrage of waggons?

**North-eastern Railway,—Inquiry No. 1.—continued.**

(B.) IN OWNERS' WAGGONS.

For the whole of the articles included in this list see Table (A.), except Salt in *bulk*.

10. State in the following Table the charges on your own lines for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement:—

Name of Article.	(a.)			(b.)		(c.)	
	What is the Minimum Charge per Ton for each Article for the shortest Distance?	What is the Minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 50 Miles?	What is your Scale of Charges according to Distance for Distances beyond 50 Miles?	What is the Charge per Ton for Terminal or Station Accommodation?	Is it included in the foregoing Charges?
Salt, in bulk, including manufactured salt, when so carried.	1s.	4 tons - -	10 miles - -	1½d. to 1d. - -	1d. to ½d. - -	See explanation given in Table (A.)	Yes.

GENERAL REMARKS.

Owners' waggons are scarcely ever used for the conveyance of this class of goods on the North-eastern Railway, except for salt (see table above), and for bricks and stone for short distances and under exceptional circumstances; in these cases a special bargain is made with each person.

10d. Do the charges include returning empty waggons? Yes.

11. Are the above charges uniformly applied between all stations on your system of railways? The rates are uniformly regulated according to the scales of charges named in each column.

12. If not, state the nature of the exceptions.

13. Is the traffic of this class conveyed at the owner's risk, or otherwise? At owner's risk.

14. Do you undertake to convey this class of traffic within a specified time? No.

15. And to return the empty waggon within a specified time? No.

And if so, in what time?

16. Do you allow demurrage on owners' waggons when not returned within the specified time?	No.
--	-----

**FOR THROUGH TRAFFIC, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.**

17. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? Yes, wherever the traffic requires it.

18. Are junctions considered as stations for this class of traffic? Not on through traffic.

19. If not, state the exceptions.

20. What arrangements are made for the interchange of traffic with other companies, when through charges are not given? The arrangements are the same as when through rates are given, the company bringing the waggons to the junction transfer them there to the other company with all necessary particulars.

### CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

21. Have you any scale of charges applicable to contracts? If so,—

<p>a. Is the charge based on a minimum annual payment, or on the quantity carried?</p> <p>b. Or how otherwise?</p>	}	No.
--	---	-----

22. Have you any special contracts independent of the foregoing scale of charges or conditions? No.

### SUPPLEMENTARY RETURN.

## COAL, COKE, IRONSTONE, LIME, AND LIMESTONE.

FOR ARTICLES CARRIED FROM STATION TO STATION ONLY, OR FROM JUNCTION TO JUNCTION ONLY, ON ALL YOUR LINES.

(A.) IN COMPANIES' WAGGONS, WHEN LOADED AND UNLOADED BY THE OWNERS.

2. State in the following Table the charges on your lines for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement:—

Name of Article.	(a.)			(b.)		(c.)		(d.)	
	What is the Minimum Charge per Ton for each Article for the shortest Distance?	What is the Minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 50 Miles?	What is your Scale of Charges according to Distance for Distances beyond 50 Miles?	What is the Charge per Ton for Terminal or Station Accommodation?	Is it included in the foregoing Charges?	What is the Charge for Loading and Unloading when done by the Company?	Is it in addition to the foregoing Charges?
Coal - - - -	1s. per ton on coals sold through the Company's depôts, and about 7d. on coals for manufacturing purposes and for shipment.	One waggon load. Coals for shipment are carried in train loads.	Four to six miles.	Coals sold through the depôts, chiefly household coal, 1½d. to ½d. Coals for manufactures and for shipment, 1½d. to ½d. Coals for shipment at Liverpool in train loads, ½d. Coals for shipment at Hull in train loads, ½d.		For coals sold through depôts, including services and sale expenses, 3d. to 1s. 3d. For coals for manufactures, 3d. to 2½d. For coals for shipment no terminal charge except as shown in column (d.)	No.          No.	For coals other than those for shipment the Company never load, but in very many cases unload, for which no charge is made beyond what is mentioned in the preceding column. For coals for shipment the Company's charge for putting them on board ship is 2½d., and is included in the rate. Where this work is done at a distant port, such as Liverpool, a charge is made by the parties doing the work, and it is not included in the rate.	

North-eastern Railway.—Inquiry No. 1.—continued.

Name of Article.	(a.)			(b.)		(c.)		(d.)	
	What is the Minimum Charge per Ton for each Article for the shortest Distance?	What is the Minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 50 Miles?	What is your Scale of Charges according to Distance for Distances beyond 50 Miles?	What is the Charge per Ton for Terminal or Station Accommodation?	Is it included in the foregoing Charges?	What is the Charge for Loading and Unloading when done by the Company?	Is it in addition to the foregoing Charges?
Coke - - -	Coke is usually charged the same rates as coals, excepting.— To Hull for shipment, in which case the charge to the Durham collieries is $\frac{1}{2}d.$ per ton per mile. From collieries north of the Wear for shipment at the ports on the Tyne and Wear the charge is $1\frac{1}{2}d.$ per ton per mile, with $3d.$ per ton for shipment.								
Ironstone - - -	$8d.$ per ton	This traffic is arranged in train loads.	Eight miles and under.	To 12 miles $1d.$ per ton per mile. Above 12 miles $\frac{1}{2}d.$ to $\frac{2}{3}d.$ , and on very long distances $\frac{1}{3}d.$ per ton per mile.		No charge made for terminals.	-	Neither operation is done by the Company.	
Lime and limestone -	$1s.$ per ton	One waggon-	Eight miles and under.	To 20 miles, $1\frac{1}{2}d.$ per ton; 20 to $28\frac{1}{2}$ , same gross rate as for 20 miles; above $28\frac{1}{2}$ miles, $\frac{1}{2}d.$ per ton. If limestone for blast furnaces, from $\frac{1}{2}d.$ to $\frac{2}{3}d.$ per ton per mile.		$3d.$ per ton	-	No	Loading not done by the Company. Unloading generally done by the Company. No charge in addition for this.

GENERAL REMARKS.

Note.—Lime is generally sold through the Company's depôts.

3. Are the above mileage charges uniformly applied between all stations on your system of railways?
4. If not, state the nature of the exceptions.
5. Is the traffic of this class conveyed at the owner's risk, or otherwise?
6. If not, state in what respects you depart from this condition.
7. Do you undertake to deliver this class of traffic within a specified time?
8. What time is allowed at the stations for loading and unloading this class of traffic?
9. What charge do you make for demurrage of waggons?

The above scales are generally applicable, subject to such modifications as the varying circumstances of the trade may render necessary.

At the owner's risk.

No.

Twenty-four hours,

Three shillings, and in some cases less, per waggon per day; but in many cases this charge is not enforced for this description of traffic.

(B.) IN OWNERS' WAGGONS.

10. State in the following Table the charges on your own line for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement :—

Name of Article.	(a.)			(b.)		(c.)	
	What is the Minimum Charge per Ton for each Article for the shortest Distance?	What is the Minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 50 Miles?	What is your Scale of Charges according to Distance for Distances beyond 50 Miles?	What is the Charge per Ton for Terminal or Station Accommodation?	Is it included in the foregoing Charges?
Coal - - -	As a rule the same charges apply as are mentioned in Return A., an allowance being made off them for waggons at the rate of $\frac{1}{2}d.$ per ton per mile. Coals for manufacturing purposes sent in train loads to places beyond the Company's system are, when carried in waggons not belonging to the Company, charged $\frac{1}{2}d.$ per ton per mile. Coals for London in train loads, and carried in waggons not belonging to the Company, are charged $\frac{1}{2}d.$ per ton per mile.						
Coke - - -	The same remarks apply to coke.						
Ironstone - - -	The same remarks apply to ironstone.						
Lime and limestone -	The same remarks apply to lime and limestone.						

- 10d. Do the charges include returning empty waggons?
11. Are the above charges uniformly applied between all stations on your system of railways?
12. If not, state the nature of the exceptions.
13. Is the traffic of this class conveyed at the owner's risk or otherwise?
14. Do you undertake to convey this class of traffic within a specified time?
15. And to return the empty waggons within a specified time?
- And if so, in what time?
16. Do you allow demurrage on owners' waggons when not returned within the specified time?

Yes.

See reply to Question 3.]

At the owner's risk.

No.

No.

No,

FOR THROUGH TRAFFIC, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

17. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions?

We do not find it necessary to make through charges with all other companies, nor generally, but arrangements to a limited extent exist with some of the neighbouring companies.

North-eastern Railway.—Inquiry No. 1.—*continued.*

18. Are junctions considered as stations for this class of traffic? Not on traffic going off the company's railways.
19. If not, state the exceptions.
20. What arrangements are made for the interchange of traffic with other companies, when through charges are not given? The empty or loaded waggons, as the case may be, are delivered into the sidings of the receiving company at the respective junctions by whom they are forwarded to their destination; the arrangement is, that they are to be taken forward with as little delay as possible.

CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

21. Have you any scale of charges applicable to contracts? If so,—
- a. Is the charge based on a minimum annual payment, or on the quantity carried? No.
- b. Or how otherwise?
22. Have you any special contracts independent of the foregoing scale of charges or conditions? Yes, the company have a special contract with the owners of collieries on the Hartlepool branch, which contract will expire in December 1866. They have also an unexpired contract with the owners of Whitwell colliery. Special arrangements are also made occasionally with gas companies.

GENERAL REMARKS.

*Note as to Column (b).—*The charges are not regulated by a mileage scale, nor solely according to distance. Within the limit of the Company's legal powers they are determined by the consideration, in the special circumstances of each case, of what will fairly remunerate the Company for their current and capital expenditure, and of what the traffic is able to bear. The figures, therefore, in column (b.) represent approximatively the charges made by the Company, the rates between any two stations depending upon the circumstances of the particular case.

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

4. Is the traffic of articles in this return conveyed at the owner's risk, or otherwise?

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

7. What time is allowed at the stations for loading and unloading this class of traffic?

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

9. What charge for warehousing is made after the period has expired?

10. What charge do you make for demurrage of waggons?

With few exceptions the rates range within the scales of charges given in each column.

The company takes the ordinary risk of a carrier unless an agreement to the contrary is made with sender.

No.

Twenty-four hours.

As a rule these goods are not warehoused except on request or when refused by consignee; in such cases the charge for warehousing begins from the expiry of one clear day after date of advice note. At Leeds and Newcastle grain is warehoused free for a fortnight.

About a halfpenny per ton per day when not requiring protection from weather; if requiring protection a penny per ton per day. Grain at Leeds and Newcastle a halfpenny per quarter per week.

Three shillings per waggon per day.

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

12. Are junctions considered as stations for the traffic of articles in this return?

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

Yes, whenever the traffic requires it.

Not on through traffic.

The arrangements are the same as when through rates are given.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

16. Have you any special contracts independent of the foregoing scale of charges or conditions?

17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars.

No.

No standing contracts, but not unfrequently make special bargains for heavy lots of goods under peculiar circumstances.

No. The exceptions are numerous and do not admit of classification. In selecting a route consideration is given not only to its comparative length, but to the gradients, convenience of working, connexion of trains, and facilities for exchange.

There being no mileage rates the question is inapplicable. Where there are alternative competing routes, the same gross rates are charged to each.

Very rarely indeed, except creosote, which is carried in the owner's tank waggons.

## GENERAL REMARKS.

Note as to Columns (a.) and (c.)—The charges are not regulated by a mileage scale, nor solely according to distance. Within the limit of the company's legal powers they are determined by the consideration, in the special circumstances of each case, of what will fairly remunerate the company for their current and capital expenditure and of what the traffic is able to bear.

The figures, therefore, in columns (a.) and (c.) represent approximatively the charges made by the company, the rates between any two stations depending upon the circumstances of the particular case.

On traffic carried at carted rates the charges made by the company include collection and delivery.

North-eastern Railway.—Inquiry No. 3.—*continued.*

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions?

4. Is the traffic of these articles carried at the company's risk (excepting the articles otherwise specified)?

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

7. What time is allowed at the stations for loading and unloading this class of traffic?

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

9. What charge for warehousing is made after the period has expired?

10. What charge do you make for demurrage of waggons?

With few exceptions the rates range within the scale of charges given in each column.

The company takes the ordinary risk of a carrier except where a special agreement to the contrary is made with sender.

No.

Twenty-four hours. But, in fact, the company begins to load or unload as soon as the goods are received.

See answer to No. 2, question 8. At Leeds we at present warehouse free wool, hair, shoddy for Hull and Hartlepool; also, fruit and potatoes, and occasionally outwards machinery.

On furniture and fifth-class articles 2*d.* per ton per day; on other articles 1½*d.* per ton per day. At Leeds, oil one week free, then 3*d.* per ton per week; flax and tow a fortnight free, then 1½*d.* per ton per week.

Three shillings per day.

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

12. Are junctions considered as stations for the traffic of articles in this return?

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

Yes, wherever the traffic requires it.

Not on through traffic.

The arrangements are the same as when through rates are given.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

16. Have you any special contracts independent of the foregoing scale of charges or conditions?

17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not state the exceptions, and give an instance of each class of exceptions.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars.

No.

No standing contracts, but sometimes make special bargains for large lots under peculiar circumstances.

See answer to Inquiry No. 2, question 17.

Are market tickets issued? If so, between what places, and at what proportion of the single fares?

Market tickets are issued to all the various market towns from the stations adjacent to such market towns, the rates being calculated at about a fare and a sixth of the single journey fares.

Give the average speeds of trains as follows :—

Average speed of express trains, including stoppages	-	-	-	-	40 miles per hour.
" " ordinary passenger trains	-	-	-	-	30 "
" " parliamentary "	-	-	-	-	20 "

Give some general information as to the nature and extent of your special excursion traffic, stating the frequency of the excursion trains, the places between which they run, the fares charged per mile for each class, the number of passengers of each class generally carried in each train, and the average speed, including stoppages.

Excursion trains are run chiefly during the summer months, and to watering places, large towns, or other places which offer attractions to the general public.

The frequency of excursion trains depends upon circumstances. The following trains were run during the summer months of 1865 :—

	1865.	Local Excursion Trains.	Foreign Excursion Trains.
June - - -	-	70	41
July - - -	-	92	45
August - - -	-	125	59
September - - -	-	76	34
October - - -	-	26	14
		389	193
Gross total - -	-	582	

The fares vary according to distance and other circumstances from  $\frac{3}{4}$ ths to  $\frac{3}{10}$ ths of a penny per mile run.

In 1865 the following local excursion trains were run :—

No. of Trains.	Number of Passengers.		
	1st Class.	In covered Carriages.	Total.
447	6,588	213,345	219,933
Average per train -	14½	477½	492

The average speed of excursion trains is about 15 miles an hour.

## INQUIRY No. 6.—As to Rates for Parcels.

Give, in reference to the lines included in your former returns, the general rates charged for parcel traffic, both by passenger and goods trains, according to weight and distance. Also add particulars of any important exceptions made to these general rates.

Parcels by passenger trains are charged on the North-eastern Railway according to the following scale :—

Distances.	Not exceeding						For every lb. above 56 lbs.	Excess Luggage per lb.
	1 lb.	2 lbs.	7 lbs.	14 lbs.	28 lbs.	56 lbs.		
	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>

51 " to 100 " - -	0 6	0 6	0 10	1 0	1 0	1 3	0 0 $\frac{1}{4}$	0 0 $\frac{1}{4}$
101 " to 150 " - -	0 6	0 9	1 0	1 2	1 6	1 9	0 0 $\frac{1}{4}$	0 0 $\frac{1}{4}$
151 " to 200 " - -	0 8	0 9	1 0	1 2	1 8	2 0	0 1	0 1
201 " to 250 " - -	0 9	1 0	1 2	1 2	2 0	2 6	0 1 $\frac{1}{4}$	0 1 $\frac{1}{4}$

There are no important exceptions made to these general rates.

Parcels by goods trains are charged on the North-eastern Railway according to the following scale :—

Distances.	Not exceeding 28 lbs.	Exceeding 28 lbs. and not exceeding 56 lbs.	Exceeding 56 lbs.
	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>
From 1 mile to 10 miles -	0 6	0 6	0 6
" 11 miles to 14 " -	0 6	0 6	0 8
" 15 " to 18 " -	0 8	0 8	0 8
" 19 " to 24 " -	0 8	0 8	0 10
" 25 " to 33 " -	0 10	0 10	0 10
" 34 " to - - -	1 0	1 0	1 0
" 35 " to 49 miles -	1 0	1 0	1 3
" 50 " to 69 " -	1 3	1 3	1 6
" 70 " to 108 " -	1 6	1 6	1 9
" 109 " to 132 " -	1 9	1 9	2 0
" 133 " to 170 " -	2 0	2 0	2 6
" 171 " to 191 " -	2 0	2 0	2 9
" 192 " to 250 " -	2 0	2 0	3 0

The above charges apply only when the consignment would not come to a larger sum at the rate per ton or per cwt., or, in the case of a mixed consignment, when the entire carriage would amount to less by charging the small articles as "small" and the bulk at the rate per ton or per cwt. than by charging the whole weight at the highest class rate to which any of the articles belong.

Exceptions are not unfrequently made, owing to various circumstances, as, for instance :—

North-eastern Railway.—Inquiry No. 8.—*continued.*

Name the stations between which the lowest rates for the conveyance of live stock are charged, showing the charge for each description, and the distances between the stations.

Kelso and York—172 miles.		£ s. d.
Fat cattle per waggon, not exceeding 15 ft. 6 in. in length	-	3 15 2
Sheep and lean cattle	-	2 17 4
Sheep during the months of September and October, when the draft ewes are being sent south	-	2 10 4

Is there any special charge for cattle to the Royal Agricultural Society's shows? If so, state it.

The North-eastern Railway Company make no charge whatever for cattle, sheep, &c. carried in cattle waggons by goods trains for exhibition at the Royal Agricultural Society's shows. They are carried free both to and from the shows if remaining the property of the exhibitor.

INQUIRY No. 9.—As to Charges at different Periods.

Give, for the lines included in your former returns, the information in the annexed table, attending to the following conditions:—

The amounts are to represent the average rates charged per mile.

For goods they are to be the rates for long distances, and including terminal charges.

In the cases of railways opened since 1840 or 1850, give the rates at the time of opening, and substitute this date at the top of the column.

The term "long distances" in this return is assumed to mean from 100 to 150 miles.

The general tendency during the last 20 years has been to a reduction of rates.

1. Give a list of the lines to which this return refers, and state their respective lengths

FOR ARTICLES CARRIED FROM STATION TO STATION ONLY, OR FROM JUNCTION TO JUNCTION ONLY, ON ALL YOUR LINES.

(A.) IN COMPANIES' WAGGONS, WHEN LOADED AND UNLOADED BY THE OWNERS.

2. State in the following Table the charges on your lines for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement:—

Name of Article.	(a.)			(b.)		(c.)		(d.)	
	What is the minimum Charge per Ton for each Article for the shortest Distance?	What is the minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 50 Miles.	What is your Scale of Charges according to Distance for beyond 50 Miles.	What is the Charge per Ton for Terminal or Station Accommodation?	Is it included in the foregoing Charges?	What is the Charge for loading and unloading when done by the Company?	Is it in addition to the foregoing Charges?
Bricks, common	s. d. 2 0	4 tons	10 miles	1½d.	(b.) Although the existing lines of the North Staffordshire Railway, the lines to which this return refers, extend over 147 miles, the longest length over which traffic can be conveyed in one direction is only 46 miles 51 chains, say from Willington to Colwich via Stoke.	(c.) No fixed or special sum is ever set aside for terminal or station accommodation. The terminals will entirely depend upon the quantity and the nature of the traffic to be conveyed, the amount of shunting to be performed, the time the sidings will be occupied, and many other circumstances.	(c.) The terminal is in all cases included in the foregoing charges.	(d.) The railway company do not undertake the loading or unloading of any of these articles.	(d.) The cost of loading and unloading is not included in the foregoing charges.

Sulphur ore	No local traffic.								
Tiles	2 0	4 tons	6 miles	1½d.					
Turf	No traffic; would be same as coal.								
Zinc ore	No traffic locally.								

### GENERAL REMARKS.

(a.) The minimum charge per ton for each article for the shortest distance.

The rate given is not the minimum charge per ton which the company charge for each article for the shortest distance, but is the highest rate of freight they demand under any circumstances. As an illustration: the company are now carrying bricks a distance of 12 miles in large quantities, say in train loads, for 6s. per truck load, which is equivalent to 6d. per ton.

**Limestone.**—The whole of the limestone carried over the North Staffordshire Railway is brought from the Cauldron Low Quarries, near Froghall, which were the property of the Trent and Mersey Canal, but, since the amalgamation, are now in the possession of the North Staffordshire Company. The limestone is said to be peculiarly suitable for use as a flux in the manufacture of pig iron, and immense quantities are exported to South Staffordshire. The average price of the stone delivered, say, at Etruria Station, near Earl Granville's iron works, a distance of 36 miles from the quarries, is 3s. 6d. per ton. This sum includes the value of the stone, the getting, locomotive power, use of waggon, road toll, terminal expenses, and every other charge.

North Staffordshire Railway.—Inquiry No. 1.—*continued.*

3. Are the above mileage charges uniformly applied between all stations on your system of railways?

No; but the charges stated are never exceeded.

4. If not, state the nature of the exceptions.

To meet the exigencies of the trade the North Staffordshire Company frequently carry at exceptionally low rates. As an illustration: during a strike of the colliers in North Staffordshire in the summer of 1864, the North Staffordshire Company conveyed coal from the Derbyshire and Leicestershire coal fields at a rate of freight barely in excess of the cost of working expenses. Had the railway company not done so, the colliers' strike would have led to a total stoppage of the potting trade in the Staffordshire potteries district; and more recently, during the strike of the puddlers in the iron trade, the company have carried puddled bars at exceptionally low rates of freight.

At owner's risk.

5. Is the traffic of this class conveyed at the owner's risk, or otherwise?

6. If not, state in what respects you depart from this condition.

7. Do you undertake to deliver this class of traffic within a specified time?

No special undertaking is either required or given. The company are bound to deliver within a reasonable time, and the safe and proper working of the traffic necessitates that this shall be done.

8. What time is allowed at the stations for loading and unloading this class of traffic?

24 hours, or one clear day.

9. What charge do you make for demurrage of waggons?

1s. 6d. per waggon per day.

(B.) IN OWNERS' WAGGONS.

GENERAL REMARKS.

*Owners' Waggons.*—The only traffic carried (locally) upon the North Staffordshire Railway in owners' waggons is coal, ironstone, iron ore, coke, and salt, in fact the company find waggons for the conveyance of every description of traffic, with the exception of salt, which article is so very injurious to the trucks that it requires a special stock to be kept for its conveyance. Traders upon this line of railway are so satisfied of the advantages to be derived by the company being the owners of the whole of the stock of waggons working upon the line, that within the last 18 months they have sold, and the company have purchased, at least nine-tenths of the entire stock of owners' waggons which were working (locally) upon this line of railway.

North Staffordshire Railway.—Inquiry No. 1.—*continued.*

- 10d. Do the charges include returning empty waggons? The company have not hitherto made any charge to returning empty waggons.
11. Are the above charges uniformly applied between all stations on your system of railways? No; but the charges stated are never exceeded.
12. If not, state the nature of the exceptions. The same general remark will be a reply to this question as was given to No. 4.
13. Is the traffic of this class conveyed at the owner's risk, or otherwise? At owner's risk.
14. Do you undertake to convey this class of traffic within a specified time? No special undertaking is either required or given. The company are bound to deliver within a reasonable time, and the safe and proper working of the traffic necessitates that this shall be done.
15. And to return the empty waggons within a specified time? The same general remark will be a reply to these questions as was given in No. 14.
- And if so, in what time?
16. Do you allow demurrage on owners' waggons when not returned within the specified time? No.

## FOR THROUGH TRAFFIC, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

17. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? Yes.
18. Are junctions considered as stations for this class of traffic? All North Staffordshire junctions are stations, but they are not considered as stations when through charges are made.
19. If not, state the exceptions. See reply to No. 18.
20. What arrangements are made for the interchange of traffic with other companies, when through charges are not given? The waggons are labelled through to their destination, the local charges are made to the junctions, and the company taking the traffic forward is furnished with a declaration giving the names and address of the consignor and consignee, a description of the traffic, the numbers and owners of the waggons, the gross weight, the tare, and the net weight.

## CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

21. Have you any scale of charges applicable to contracts? No.
- If so,—
- a. Is the charge based on a minimum annual payment, or on the quantity carried?
- b. Or how otherwise?
22. Have you any special contracts independent of the foregoing scale of charges or conditions? None, except such as may be referred to in the general remarks in answer to questions 4 and 12.

## INQUIRY No. 2.—Questions in regard to Railway Charges.

## FOR ARTICLES CARRIED FROM STATION TO STATION ONLY, OR FROM JUNCTION TO JUNCTION ONLY, ON ALL YOUR LINES, IN COMPANIES' WAGGONS.

1. State in the following Table the charges on your lines for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement:—

Name of Article.	(a.)			(b.)		(c.)		(d.)		
	What is the minimum Charge per Ton for each Article for the shortest Distance?	What is the minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 50 Miles?	What is your Scale of Charges according to Distance for Distances beyond 50 Miles?	What is the Charge per Ton for Terminal or Station Accommodation?	Is it included in the foregoing Charges?	What is the Charge for Loading and Unloading when done by the Company?	Is it in addition to the foregoing Charges?	Is any and what Deduction made when the Loading or Unloading is done by the Owner?
For the whole of the articles included in the SPECIAL CLASS of the Clearing House Classification. Appendix CP.	Two shillings per ton. See Note (a.) against remarks to Inquiry No. 1.	Two tons.	Six miles.	From 1½d. to 1½d. per ton per mile.	Although the lines of the North Staffordshire Railway, the lines to which this return refers, extend over 147 miles, the longest length over which traffic can be conveyed in one direction is only 48 miles 51 chains, say from Wellington to Colwich via Stoke.	No fixed or special sum is ever set aside for terminal or station accommodation. The terminals will entirely depend upon the quantity and the nature of the traffic to be conveyed, the amount of shunting to be performed, the time the sidings will be occupied, and many other circumstances.	Yes.	No special charge is made. We always expect the consignor and consignee to assist in loading and unloading.		None.

North Staffordshire Railway.—Inquiry No. 2.—*continued.*

2. Are the above mileage charges uniformly applied between all stations on your system of railways?
3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.
4. Is the traffic of articles in this return conveyed at the owner's risk, or otherwise?
5. If not, state in what respects you depart from this condition.
6. Do you undertake to deliver the traffic of articles in this return within a specified time?
7. What time is allowed at the stations for loading and unloading this class of traffic?
8. For what period do you keep any of the articles in this return in your warehouses free of charge?
9. What charge for warehousing is made after the period has expired?
10. What charge do you make for demurrage of waggons?

No, but these charges are never exceeded.

At company's risk, except when the owners wish to accept the risk of carriage, when a reduction in rate of from 5 to 20 per cent. is made.

No special undertaking is either required or given. The company are bound to deliver within a reasonable time, and the safe and proper working of the traffic necessitates that this shall be done.

48 hours, or two days.

At some stations for an unlimited time, at others for three days, according to the accommodation we are in a position to give.

From 2*d.* per package per week to 6*d.* per ton per week, according to the nature of the traffic.

From 1*s.* 6*d.* to 2*s.* per waggon per day.

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.
12. Are junctions considered as stations for the traffic of articles in this return?
13. If not, state the exceptions, and give an instance of each class of exception.
14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

We make through rates with every company in Great Britain, except three companies south of the Thames.

All North Staffordshire junctions are stations, but they are not considered as stations when through charges are made.

The waggons are labelled through to their destination, the local charges are made to the junctions, and the company taking the traffic forward is furnished with a declaration giving the names and address of the consignor and consignee, a description of the traffic, the numbers and owners of the waggons, the gross weight, the tare, and the net weight.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—
  - a. Is the charge based on a minimum annual payment, or on the quantity carried?
  - b. Or how otherwise?
16. Have you any special contracts independent of the foregoing scale of charges or conditions?
17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.
18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.
19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars.

No.

Not in all cases, but we always send by the most expeditious route.

The shortest mileage rates always apply to the longest route, i.e., the shortest mileage always fixes the rate.

No.

INQUIRY No. 3.—Questions in regard to Railway Charges.

1. State in the following Table the charges for the conveyance of the various articles named, between stations on your own lines, in tons of 2,240 lbs., or the equivalent measurement, including collection and delivery. Specify against any of these articles those which are from station to station only.

Name of Article.	(a.)		(b.)		(c.)	(d.)	(e.)		(f.)	(g.)
	What is the minimum Charge for Articles under 112 lbs. Weight?	What is the Scale of Charge for Articles under 112 lbs. according to Distance?	What is the minimum Charge per Ton?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded?	What is the Charge per Ton for Portage and Station Accommodation?	Are these Charges included in the Mileage Rates?	What is the Charge per Ton for Collection and Delivery?	Are these Charges included in the Mileage Rates?	Are there any exceptional Charges for Collection and Delivery? If so, state the Stations and Charges.

Are there any exceptional Charges for Collection and Delivery? If so, state the Stations and Charges.	Are any of these Articles carried upon Toll, and, if so, at what Rates?
Acids and other highly corrosive articles.	The company have no fixed scale. The traffic is only conveyed under special agreement.										
Basket carriage bodies and Bath chairs, at company's risk.	No traffic.										
Caravans, showmen's and others.	6d. per ton per mile for the first ton, no less charge than for 20 miles. Weights above a ton, 2d. per ton per mile additional.										
Carriage bodies, finished, in cases.	6d. per carriage per mile; no less charge than 5s.; generally conveyed by passenger trains.										
Railway carriages, on their own wheels.	6d. per carriage per mile; no less charge than 20s.										
Boilers of unusual dimensions.	No fixed scale. These are always carried by special agreement.										
Contractors' waggons and materials (excepting rails and chairs).	To 50 miles, 3d. per ton per mile; no less charge than 5s. per ton.										
Furniture, in mats or loose.	No fixed scale, always carried by special arrangement.										
Furniture, in vans, carts, or frames.	No fixed scale, always carried by special arrangement.										
Forgings or castings, above six tons.	No fixed scale, always carried by special arrangement.										
Gunpowder.	No local traffic, except such as may be carried under a contract for Her Majesty's War Office.										
Lucifer matches and other inflammable articles.	No fixed scale, always carried by special arrangement.										
Locomotive engines and tenders, on their own wheels.	2d. per ton per mile; no less charge than 5s. per ton.										
Petroleum and photogenic oil.	No local traffic, carried by special arrangement.										
Railway waggons.	Under three tons 3d. per waggon per mile; over three tons, 4d. per waggon per mile. No less charge than 5s. per waggon.										
Statuary.	No traffic, would be carried under special arrangement only.										
Returned empty packages.	Not exceeding 50 miles, 4d. per cwt. No less charge than 4d. per package for any distance.										
Small parcels.	6d. { "   above 30 miles   9d.   1s.   1s. 6d.   2s.										

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

4. Is the traffic of these articles carried at the company's risk (excepting the articles otherwise specified)?

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

7. What time is allowed at the stations for loading and unloading this class of traffic?

No.

See Question 4, Inquiry No. 1, as an illustration. Many similar cases can be given.

All the articles are carried at company's risk except by special agreements and the articles enumerated in the Carriers Act, 1 Will. 4. c. 68.

If the consignor desire that the goods shall be carried at the risk of the owner a reduction in the rate is made ranging from 5 to 20 per cent.

No special undertaking is either required or given. The company are bound to deliver within a reasonable time, and the safe and proper working of the traffic necessitates that this shall be done.

48 hours or two days; but for this class of traffic the loading and unloading in the great majority of cases is done by the company's servants.

North Staffordshire Railway.—Inquiry No. 3.—*continued.*

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

At some stations we warehouse free, at others we charge after three clear days; this depends entirely upon the nature of the traffic and the amount of accommodation the company can afford.

9. What charge for warehousing is made after the period has expired?

At some stations nothing, at others from 2d. per package per week, to 6d. per ton per week, according to the nature of the traffic.

10. What charge do you make for demurrage of waggons?

No charge where the company have warehouse accommodation, at other stations 1s. 6d. per waggon per day on N.S. waggons.

## FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

We make through rates with every company in Great Britain, except three companies south of the Thames.

12. Are junctions considered as stations for the traffic of articles in this return?

All North Staffordshire junctions are stations, but they are not considered as stations when through charges are made.

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

The waggons are labelled through to their destination, the local charges are made to the junctions, and the company taking the traffic forward is furnished with a declaration giving the names and address of the consignor and consignee, a description of the traffic, the numbers and owners of the waggons, the gross weight, the tare, and the net weight.

## GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

a. Is the charge based on a minimum annual payment, or on the quantity carried?  
b. Or how otherwise?

No.

16. Have you any special contracts independent of the foregoing scale of charges or conditions?

None, except such as may be referred to in the general remarks in answer to Questions 4 and 12, Inquiry No. 1.

17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.

Not in all cases, but we always send by the most expeditious route.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

The shortest mileage rates always apply to the longest route, i.e., the short mileage always fixes the rate.

19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars.

No, with the exception of furniture, which is sometimes carried in owner's vans loaded upon railway company's waggons.

Give the average speeds of trains as follows:—

Average speed of express trains, including stoppages	-	-	-	-
„ „ ordinary passenger trains	„	„	„	24 miles per hour.
„ „ parliamentary	„	„	„	22 „

Give some general information as to the nature and extent of your special excursion traffic, stating the frequency of the excursion trains, the places between which they run, the fares charged per mile for each class; the number of passengers of each class generally carried in each train, and the average speed, including stoppages.

The bulk of our excursion traffic is with the under-mentioned places. We have given the results of the trains run from 1st May to 30th September 1864, the traffic in that year showing a good average. In the cases of Chester and Rhyl, &c. and Alton the trains ran weekly; in the others only on special occasions.

Average speed, including stoppages, 20 miles per hour.

The reduction in the Alton fares is in consequence of the distance by road being shorter.

INQUIRY No. 6.—As to Rates for Parcels.

Give, in reference to the lines included in your former returns, the general rates charged for parcel traffic, both by passenger and goods trains, according to weight and distance. Also add particulars of any important exceptions made to these general rates.

Parcels by goods trains.—The parcels rates are so numerous and are modified by so many varying circumstances that we cannot do more than give an approximated scale of the charges made, say,—

Miles.	Not exceeding 28 lbs.	Not exceeding 56 lbs.	Not exceeding 112 lbs.

Above 112 lbs. the parcels rate is charged until the tonnage rate applies.

North Staffordshire Railway—*continued*.**INQUIRY No. 7.—As to Charges for Horses, Carriages, and Dogs by Passenger Trains.**

Insert in the following Table the rates charged for horses, carriages, and dogs carried by passenger trains on the lines included in your former returns.

Q 2

London and South-western Railway.—Inquiry No. 1.—*continued.*

3. Are the above mileage charges uniformly applied between all stations on your system of railways?  
4. If not, state the nature of the exceptions.

No, as the circumstances vary, so the charges between different points or for particular descriptions of traffic vary. The nature of the exceptions is, for example, where traffic is conveyed for long distances, such as clay conveyed from Poole to London, a distance of 120 miles, the charge in that case being one halfpenny per ton per mile, exclusive of terminal charges: Again, coal, bricks, &c. conveyed for long distances are conveyed at reduced rates.  
At owner's risk.

5. Is the traffic of this class conveyed at the owner's risk, or otherwise?

See No. 5.

6. If not, state in what respects you depart from this condition.

7. Do you undertake to deliver this class of traffic within a specified time?

No, but the same despatch is given to this description of traffic as to any other.  
48 hours.

8. What time is allowed at the stations for loading and unloading this class of traffic?

9. What charge do you make for demurrage of waggons?

3s. per day.

- 10d. Do the charges include returning empty waggons?

In all cases where owners' waggons are used the charges include the return of the empty waggons.  
No.

11. Are the above charges uniformly applied between all stations on your system of railways?

12. If not, state the nature of the exceptions.

The nature of the exceptions is, for example, where traffic is conveyed for very long distances, and for particular descriptions of traffic.  
At owner's risk.

13. Is the traffic of this class conveyed at the owner's risk, or otherwise?

14. Do you undertake to convey this class of traffic within a specified time?

No, but it is conveyed with as much despatch and regularity as any other traffic.

15. And to return the empty waggons within a specified time?

No.

And if so, in what time?

The waggons are, as a general rule, returned immediately they have been unloaded.

16. Do you allow demurrage on owners' waggons when not returned within the specified time?

No.

London and South-western Railway.—Inquiry No. 1.—*continued.*

FOR THROUGH TRAFFIC, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

17. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions?

In general through rates exist.

18. Are junctions considered as stations for this class of traffic?

Not as stations, but as places of interchange.

19. If not, state the exceptions.

See No. 18.

20. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

The traffic is consigned to and from the junctions; the waggons go on as if through charges existed, unless where a break of gauge occurs, when the traffic must necessarily be transferred.

CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

21. Have you any scale of charges applicable to contracts? If so,—

No.

a. Is the charge based on a minimum annual payment, or on the quantity carried?

See No. 21.

b. Or how otherwise?

See No. 21.

22. Have you any special contracts independent of the foregoing scale of charges or conditions?

No.

INQUIRY No. 2.—Questions in regard to Railway Charges.

FOR ARTICLES CARRIED FROM STATION TO STATION ONLY, OR FROM JUNCTION TO JUNCTION ONLY, ON ALL YOUR LINES, IN COMPANIES' WAGGONS.

1. State in the following Table the charges on your lines for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement :—

Name of Article.	(a.)			(b.)		(c.)		(d.)		
	What is the Minimum Charge per Ton for each Article for the shortest Distance?	What is the Minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 50 Miles?	What is your Scale of Charges according to Distance for Distances beyond 50 Miles?	What is the Charge per Ton for Terminal or Station Accommodation?	Is it included in the foregoing Charges?	What is the Charge for Loading and Unloading when done by the Company?	Is it in addition to the foregoing Charges?	Is any and what Deduction made when the Loading or Unloading is done by the Owner?
For the whole of the articles included in the Special Class of the Clearing House Classification. Appendix C.	In some districts 2s. 6d. up to 10 miles; in other districts 3s. 4d. up to 20 miles.	Two tons.	Ten or twenty miles respectively.	2d. per ton per mile additional up to 30 miles. 1½d. above 30 and up to 50 miles. 1½d. " 60 " 80 miles. 1½d. " 80 " 120 miles. 1½d. " 120 " 150 miles. 1d. above 150 miles.		Varies as circumstances require.	In some cases.	3d. per ton for each service.	Yes.	No such charge is made for either service.

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

Yes, as a general rule, but in numerous instances lower rates are charged.

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

Generally low-priced articles, which will not bear a higher rate.

4. Is the traffic of articles in this return conveyed at the owner's risk, or otherwise?

At owner's risk.

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

No, but no delay in delivery occurs.

7. What time is allowed at the stations for loading and unloading this class of traffic?

24 hours for each service.

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

Not generally warehoused.

9. What charge for warehousing is made after the period has expired?

Varies according to circumstances.

10. What charge do you make for demurrage of waggons?

3s. per day.

London and South-western Railway.—Inquiry No. 2.—continued.

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

12. Are junctions considered as stations for the traffic of articles in this return?

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?
- Yes, by mutual agreement when it is necessary and desirable to do so.

Not as stations, but as places of interchange.

Local rates are charged. In all other respects the traffic is conveyed throughout without change of waggon in quantities of two tons or upwards.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

16. Have you any special contracts independent of the foregoing scale of charges or conditions?

17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars.
- No, but special rates are given for large quantities or for certain descriptions of goods, applicable to all parties alike.

Not always, but as a rule by the quickest and most convenient route.

Yes.

Not as a general rule.

London and South-western Railway.—Inquiry No. 3.—*continued.*

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

No, there are numerous exceptions.

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

Exceptions may generally be described thus:—Import and export goods from and to Southampton and other ports are charged at lower rates.

Goods conveyed for long distances are charged at lower rates.

Yes.

4. Is the traffic of these articles carried at the company's risk (excepting the articles otherwise specified)?

By special risk note, and as respects goods included in the Carriers' Act.

5. If not, state in what respects you depart from this condition.

No, but within a reasonable time.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

The company perform the loading and unloading.

7. What time is allowed at the stations for loading and unloading this class of traffic?

Not generally warehoused.

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

Varies according to circumstances.

9. What charge for warehousing is made after the period has expired?

None.

10. What charge do you make for demurrage of waggons?

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

Yes, by mutual agreement, when it is necessary and desirable to do so.

12. Are junctions considered as stations for the traffic of articles in this return?

Not as stations, but as places of interchange.

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies when through charges are not given?

Local rates are charged. In all other respects the traffic is conveyed throughout without change of waggon in quantities of one ton or upwards.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

a. Is the charge based on a minimum annual payment, or on the quantity carried?

No, but special rates are given for large quantities, or for certain descriptions of goods, applicable to all parties alike.

b. Or how otherwise?

16. Have you any special contracts independent of the foregoing scale of charges or conditions?

17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.

Not always, but as a rule by the quickest and most convenient route.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

Yes.

19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars.

No.

INQUIRY No. 4.—As to Acts of Parliament authorizing Tolls and Rates.

Give a list of the Acts of Parliament now in force, under which you are authorized to levy tolls and rates on the lines included in your former return.

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

Yes.

4. Is the traffic of articles in this return conveyed at the owner's risk, or otherwise?

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

Within about 24 hours.

7. What time is allowed at the stations for loading and unloading this class of traffic?

48 hours.

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

48 hours.

9. What charge for warehousing is made after the period has expired?

Various.

10. What charge do you make for demurrage of waggons?

3s. per truck after 48 hours.

#### FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

Yes.

12. Are junctions considered as stations for the traffic of articles in this return?

Yes.

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

Traffic for which through charges are not given is interchanged at all junctions with other companies under arrangements for its despatch in the same waggons when in full loads, and for transhipment when in loads of less than one ton.

#### GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

We make a small per-centage allowance to some of our largest customers, but beyond that we have no contract rates.

London, Brighton, and South Coast Railway.—Inquiry No. 2.—*continued.*

16. Have you any special contracts independent of the foregoing scale of charges or conditions?

No.

17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.

As a rule it is, but to the large manufacturing districts in the midland and northern counties it is apportioned as equally as possible.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

Yes.

19. Are any articles in this class ever carried in owner's waggon? If so, state the particulars.

Yes, salt.

**INQUIRY No. 4.—As to Acts of Parliament authorizing Tolls and Rates.**

Give a list of the Acts of Parliament now in force, under which you are authorized to levy tolls and rates on the lines included in your former return.

The tolls and rates which the company were authorized to levy by former Acts were all repealed by the company's " Mitcham and Tooting Lines Act, 1863" (26 & 27 Vict. c. 218.), and in all subsequent Acts which the company has obtained they have adopted the clauses in that Act.

# GREAT WESTERN RAILWAY.

## INQUIRY No. 1.—Questions in regard to Railway Charges.

1. Give a list of the lines to which this return refers, and state their respective lengths.

This return refers generally to the whole of the Great Western system of railways, including the lines leased and worked by them, but with respect to some of them not owned by the Great Western Company there is some difference in the mode of charging, but which is not very material.

Great Western Railway.—Inquiry No. 1.—*continued.*

3. Are the above mileage charges uniformly applied between all stations on your system of railways?  
4. If not, state the nature of the exceptions?

Not uniformly, the traffic and circumstances frequently necessitating a variation in the charges.  
Traders finding their own waggons. Guaranteeing a large minimum annual payment. Full train loads. Shipping trade. Competition by sea, and other circumstances.  
As regards ordinary risk, at owner's.

5. Is the traffic of this class conveyed at the owner's risk, or otherwise?

See above answers.

6. If not, state in what respects you depart from this condition?

No. In certain cases the public ask for a special arrangement, which is done.

7. Do you undertake to deliver this class of traffic within a specified time?

No specific time for loading. For unloading 24 hours in some cases, and 48 in others.

8. What time is allowed at the stations for loading and unloading this class of traffic?

3s. per day in some cases, 3s. 6d. per day in others, advancing according to the time detained, with a view of inducing parties not to detain waggons.

9. What charge do you make for demurrage of waggons?

(B.) IN OWNERS' WAGGONS.

10(d.) Do the charges include returning empty waggons?

Yes.

11. Are the above charges uniformly applied between all stations on your system of railways?

The rates are not uniform between all places, as explained in No. 4.

12. If not, state the nature of the exceptions?

As regards ordinary risk, at owner's.

13. Is the traffic of this class conveyed at the owner's risk, or otherwise?

No.

14. Do you undertake to convey this class of traffic within a specified time?

No arrangement as to the return of empty waggons, but owner's trucks are treated, so far as regards dispatch, precisely the same as the company's.

15. And to return the empty waggons within a specified time?

And if so, in what time?

No. The company do not make it compulsory for parties to find their own waggons, it is optional for them to put the waggons on the line.

16. Do you allow demurrage on owner's waggons when not returned within the specified time?

FOR THROUGH TRAFFIC, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

17. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions?

Yes.

18. Are junctions considered as stations for this class of traffic?

Practically they are not, as the traffic is generally charged at through rates. There are a few cases where traffic is booked locally, when a terminal charge is made for junction accommodation or service.

19. If not, state the exception?

20. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

The traffic is sent through in the same waggon, when containing above one ton of goods or a full load of minerals.

Great Western Railway.—Inquiry No. 1.—*continued.*

## CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

21. Have you any scale of charges applicable to contracts? If so,—

- a. Is the charge based on a minimum annual payment, or on the quantity carried?  
b. Or how otherwise?

22. Have you any special contracts independent of the foregoing scale of charges or conditions?

Yes, for coal.

On a minimum annual payment.

Full train loads, and other special conditions.

For guaranteed quantities sent in owner's trucks over distances exceeding 100 miles, yearly payment not to be less than 5,000*l.* Freight to uniformly seven-sixteenths of one penny per ton per mile with the following terminals:—Freights exceeding per annum 40,000*l.*, 3*d.*; 30,000*l.*, 6*d.*; 20,000*l.*, 9*d.*; 15,000*l.*, 1*s.*; 10,000*l.*, 1*s.* 3*d.*; 5,000*l.*, 1*s.* 6*d.* For guaranteed quantities sent in owner's trucks distances over 50 and under 100 miles, freight to be uniformly  $\frac{1}{2}$ *d.* per ton per mile with following terminals:—Per annum, 15,000*l.*, 4*d.*; 10,000*l.*, 6*d.*; 7,500*l.*, 8*d.*; 5,000*l.*, 10*d.*; 2,500*l.*, 1*s.*

## FOR ARTICLES CARRIED FROM STATION TO STATION ONLY, OR FROM JUNCTION TO JUNCTION ONLY, ON ALL YOUR LINES, IN COMPANIES' WAGGONS.

1. State, in the following Table, the charges on your lines for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement:—

Name of Article.	(a.)			(b.)		(c.)		(d.)		
	What is the Minimum Charge per Ton for each Article for the shortest Distance?	What is the Minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 50 Miles?	What is your Scale of Charges according to Distance for Distances beyond 50 Miles?	What is the Charge per Ton for Terminal or Station accommodation?	Is it included in the foregoing Charges?	What is the Charge for Loading and Unloading when done by the Company?	Is it in addition to the foregoing Charges?	Is any and what Deduction made when the Loading or Unloading is done by the Owner?
For the whole of the articles included in the SPECIAL CLASS of the Clearing House Classification. Appendix C.P., except Military baggage.	2 <i>s.</i> 6 <i>d.</i> to 3 <i>s.</i> 6 <i>d.</i> per ton.	2 tons in some, and special cases 1 ton.	Up to 10 miles.	11 <i>d.</i> to 2 <i>d.</i> per ton per mile, but lower rates are made to meet special cases.		1 <i>s.</i> 6 <i>d.</i> to 2 <i>s.</i> 6 <i>d.</i> per ton.	Yes - No.	6 <i>d.</i> per ton.	Yes. No.	1 No.
Baggage Military.	2 <i>s.</i> 6 <i>d.</i> per ton.	Any weight	10 miles -	2 <i>d.</i> per ton per mile.		-	Yes - No.	Loading and unloading performed by the troops.	Yes.	

2. Are the above mileage charges uniformly applied between all stations on your systems of railways?

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

4. Is the traffic of articles in this return conveyed at the owner's risk, or otherwise?

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

7. What time is allowed at the stations for loading and unloading this class of traffic?

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

9. What charge for warehousing is made after the period has expired?

10. What charge do you make for demurrage of waggons?

Not uniformly. The traffic and circumstances frequently necessitate a variation in the charges.

When traders find their own waggons, When there is a large trade. When for a shipping trade. Competition by sea, and other circumstances.

As regards the ordinary risk, generally at owner's.

See answer to No. 4.

No. In certain cases, if the public ask for a special arrangement, it is arranged.

No specific time for loading. For unloading 24 hours in some cases, and 48 hours in others. This is regulated according to station accommodation, and the nature and extent of the traffic.

Sometimes a week, in other cases a fortnight, and in others a month.

Varying from 2*d.*, 4*d.*, and 6*d.* per ton per week, according to the different districts, the cost of service, and accommodation required.

3*s.* per day in some cases, and 3*s.* 6*d.* in others, advancing according to the time detained, with a view of inducing parties not to detain waggons.

## FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

12. Are junctions considered as stations for the traffic of articles in this return?

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

Yes.

Practically they are not, as the traffic is generally charged at through rates, but when a transfer from one gauge to another has to be performed, a charge is sometimes made.

The traffic is sent through in the same waggon when containing a full load, and as a rule invoiced through.

Great Western Railway.—Inquiry No. 2.—*continued.*

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—
- a. Is the charge based on a minimum annual payment, or on the quantity carried?
- b. Or how otherwise?
16. Have you any special contracts independent of the foregoing scale of charges or conditions?
17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.
18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.
19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars.

Not for traffic included in this statement.

No.

Not in all cases, where the company have more than one route the traffic is classified and worked by the route which is most convenient and expeditious.

On our own line, yes.

Very seldom.

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

4. Is the traffic of these articles carried at the company's risk (excepting the articles otherwise specified)?

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

7. What time is allowed at the stations for loading and unloading this class of traffic?

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

9. What charge for warehousing is made after the period has expired?

10. What charge do you make for demurrage of waggons?

Not uniformly. The traffic and circumstances frequently necessitate a variation in the charges.

Shipping trade, competition by sea, and other circumstances.

Generally at company's risk. When at owner's risk a lower rate is charged to the public.

No, but they are delivered as soon as possible, depending on the distance, the load in the truck, &c.

From 24 to 48 hours allowed.

The charge will vary according to the district, the cost of service and the accommodation required,

3s. per day in some cases and 3s. 6d. in others, advancing according to the time detained, with a view of inducing parties not to detain waggons.

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

12. Are junctions considered as stations for the traffic of articles in this return?

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

Yes, generally.

Practically they are not, as the traffic is generally charged at through rates, but in cases where transfer from one gauge to another has to be performed a charge has to be included for that service and for the accommodation.

In many cases through trains, and generally through waggons when the load is sufficient.

## GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—
- |  |            |
|--|------------|
| <p><i>a.</i> Is the charge based on a minimum annual payment, or on the quantity carried?</p> <p><i>b.</i> Or how otherwise?</p> | <p>No.</p> |
|--|------------|
16. Have you any special contracts independent of the foregoing scale of charges or conditions? No.
17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions. Not in all cases, where the company have more than one route the traffic is classified and worked by that route which is most convenient and expeditious.
18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply. Yes, generally.
19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars. No.

10d. Do the charges include returning empty waggons?

Yes.

11. Are the above charges uniformly applied between all stations on your system of railways?

Yes, except as follows.

12. If not, state the nature of the exceptions.

Where parties have private sidings adjoining the main line, and in cases of coal for shipment. Owner's risk.

13. Is the traffic of this class conveyed at the owner's risk, or otherwise?

No.

14. Do you undertake to convey this class of traffic within a specified time?

No.

15. And to return the empty waggons within a specified time?

No.

And if so, in what time?

16. Do you allow demurrage on owner's waggons when not returned within the specified time?

## FOR THROUGH TRAFFIC, WHETHER IN COMPANIES' OR OWNERS' WAGGONS.

17. Do you make through charges for this class of traffic with all other railway companies connected with your system of junctions?

Yes, when required and agreed to by adjoining companies.

18. Are junctions considered as stations for this class of traffic?

Yes, all our junctions being stations, except one, to which no traffic is entered.

19. If not, state the exceptions.

20. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

The traffic is entered to the junction station and handed over to the forward company.

## CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

21. Have you any scale of charges applicable to contracts? If so,—

No.

a. Is the charge based on a minimum annual payment, or on the quantity carried?

We have not any.

b. Or how otherwise?

22. Have you any special contracts independent of the foregoing scale of charges or conditions?

Yes, with a few large millers.

Manchester, Sheffield, and Lincolnshire Railway—continued.

INQUIRY No. 2.—Questions in regard to Railway Charges.

FOR ARTICLES CARRIED FROM STATION TO STATION ONLY, OR FROM JUNCTION TO JUNCTION ONLY, ON ALL YOUR LINES, IN COMPANIES' WAGGONS.

1. State in the following Table the charges on your lines for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement :—

Name of Article.	(a.)			(b.)		(c.)		(d.)		
	What is the Minimum Charge per Ton for each Article for the shortest Distance?	What is the Minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 50 Miles?	What is your Scale of Charges according to Distance for Distances beyond 50 Miles?	What is the Charge per Ton for Terminal or Station Accommodation?	Is it included in the foregoing Charges?	What is the Charge for Loading and Unloading when done by the Company?	Is it in addition to the foregoing Charges?	Is any and what Deduction made when the Loading or Unloading is done by the Owner?
For the whole of the articles included in the SPECIAL CLASS of the Clearing House Classification Appendix C.P.	1s. 8d. to 2s. 6d.	Two tons.	Six miles.	1½d. to 2d.	1d. to 1½d.	This varies according to circumstances.	It is in addition to the foregoing charges.	The rule is for the sender or consignee and the company to assist each other. There are cases where it is wholly done by the company, and for which no extra charge is made.		

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

4. Is the traffic of articles in this return conveyed at the owner's risk, or otherwise?

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

7. What time is allowed at the stations for loading and unloading this class of traffic?

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

9. What charge for warehousing is made after the period has expired?

10. What charge do you make for demurrage of waggons?

No. We have to be guided by what is best for the development of the traffic.

To meet competition by sea and from other markets, the nature and value of the traffic and what rate it can bear, and shorter railway routes.

At company's risk generally.

We charge higher class goods at special class rate when owner takes the risk.

No.

Two days.

These articles are not warehoused, except grain, flour, and malt.

This varies according to article, locality, and accommodation, and in a few instances no charge is made.

3s. per day.

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exception.

12. Are junctions considered as stations for the traffic of articles in this return?

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

Yes; by mutual arrangement, when required to do so.

Yes, unless such are entered "through" to stations beyond the junction.

When the traffic is carried from or to the junction at local rates.

It is entered to the junction at local rates, and if the waggon contains two tons or upwards it is allowed to go forward to the destination of the goods.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

16. Have you any special contracts independent of the foregoing scale of charges or conditions?

17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars.

No, but special rates are made applicable to all persons under the same circumstances, for guaranteed quantities.

No. There are many cases where the shortest route is not the most expeditious, arising from a variety of causes.

Yes.

Yes. Creosote, gas and coal tar, and salt, are carried in owner's waggons, and this is taken into consideration in fixing the rates for such articles.

Varies from 2d. to 4d., but distance does not govern the charge. This has to be arranged so as to meet the requirements of the trade, and develop the traffic consistently with the interests of the company and the powers given to them.	Varies from 1s. 9d. and upwards at each end, according to the nature of the traffic.	No, but are included in the gross rate charged.	This varies according to the locality from 1s. 8d. to 3s. 4d.	No, but are included in the gross rate charged.	Yes, they are numerous, say for bulky light goods, for heavy castings, and for fragile articles; for bad roads and long distances.	No.

These replies refer to all articles mentioned in this Inquiry No. 3, except acids, railway carriages and waggons, contractors' waggons and materials, gunpowder, lucifer matches, locomotive engines and tenders on own wheels, and statuary, for which see remarks opposite each.

2. Are the above mileage charges uniformly applied between all stations on your system of railways?  
3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

4. Is the traffic of these articles carried at the company's risk (excepting the articles otherwise specified)?  
5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

7. What time is allowed at the stations for loading and unloading this class of traffic?

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

9. What charge for warehousing is made after the period has expired?

10. What charge do you make for demurrage of wagons?

No; there are many exceptions made in order to meet the necessities of the trade, its proper development, and competition.

At company's risk, excepting those provided for in the Carriers' Act, when above 10l. value. For some goods special arrangements are made, should the owner wish to take the risk, by charging the rate for a class lower than that in which the goods are named.

Within a reasonable time.

This is done by the company, who, for their own interest, use every exertion to do it quickly.

Varies according to article and locality.

Generally the goods are collected, loaded, unloaded, and delivered by the company, and consequently demurrage does not arise.

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exception.

Yes, by mutual arrangement, when required to do so.

12. Are junctions considered as stations for the traffic of articles in this return?

Not when carried at through rates.

13. If not, state the exceptions, and give an instance of each class of exception.

When there are no through-rates, the goods being entered locally.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

The goods are entered to the junction best suited to expedite the traffic, and the waggon may be sent forward with the same goods if it contains one ton and upwards.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

No.

- a. Is the charge based on a minimum annual payment, or on the quantity carried?
- b. Or how otherwise?

16. Have you any special contracts independent of the foregoing scale of charges or conditions?

No special contracts, but we have special rates, which are quoted to all parties under the like circumstances.

17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.

No, although the shortest route governs the rates charged, it is in some cases more expeditious and also economical to forward by a somewhat longer route.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars.

We have only one case, where sometimes a locomotive engine builder uses his own waggon.

Wheat - - - - -	See Grain, Inquiry 2.									
Whiting - - - - -	3s. 4d.	2 tons	10 miles	2d.	1½d.	3s.	Do.	Nil	-	No.

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions?

4. Is the traffic of articles in this return conveyed at the owner's risk, or otherwise?

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

7. What time is allowed at the stations for loading and unloading this class of traffic?

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

9. What charge for warehousing is made after the period has expired?

10. What charge do you make for demurrage of waggons?

No.

See attached list, marked (A.)

At company's risk, excepting where specified in this return at owner's risk.

We undertake to deliver the traffic within a reasonable time.

The company's servants load and unload this traffic when the services are not performed by the owner's servants.

48 hours for all descriptions of traffic, excepting grain and flour; and for particulars in respect to grain and flour, see attached list marked (B.)

1d. per ton per day for all descriptions of traffic, excepting grain and flour; and for particulars in respect to grain and flour, see attached list marked (B.)

No demurrage on trucks accrues; see reply to No. 7 above.

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

12. Are junctions considered as stations for the traffic of articles in this return?

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

Yes, by mutual arrangement between the respective companies.

No, excepting when there happens to be no through rate for the traffic, and in all such cases the traffic is entered at local rates to the junction.

The traffic is forwarded to destination in due course, and conveyed at local rates to the junctions most convenient of access to the railway company's system for which the traffic is intended.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

16. Have you any special contracts independent of the foregoing scale of charges or conditions?

17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars.

No.

No.

Yes, with but very few exceptions, and then only because the route is better although longer; for example, from Peterborough to Chelmsford the traffic is carried via Stratford, although the shortest route is via Haverhill and Sudbury.

Yes, the mileage rates apply to the shortest railway route.

No, excepting where specified in this return.

Great Eastern Railway.—Inquiry No. 2.—*continued.*

(A.)

Under the questions shown in the three columns (letter *d*) it will be seen that the replies have been in many instances "Nil" "No." It is therefore necessary to explain that with the traffic specified, it is the practice of the owner's servants to assist the company's servants in loading and unloading.

*Exceptional rates.*

The maximum rate for grain and flour from London to any Great Eastern station is 10s. per ton.

The maximum rate for grain from any Great Eastern station to London is 11s. 8d. per ton.

The maximum rate for flour from any Great Eastern station to London is 10s. per ton.

The maximum rate for packed manures from London to any Great Eastern station is 11s. 6d. per ton.

The maximum rate for oil cake between any two Great Eastern stations is 9s. per ton.

The mileage scale of rates is departed from in cases where the railway has to complete with sea, river, or canal; for example,

Grain, Ipswich to London, is carried	68 miles at	s. d.	
Packed manures, London to Lynn	- - - - - 98½	7 0	per ton.
" " " and Wisbeach	- - - - - 95½	8 0	"
Oil cake, Lynn and Yarmouth	- - - - - 69	6 0	"
Flour, Yarmouth to London	- - - - - 121	8 0	"
Malt	- - - - -	9 8	"
Also in cases where the traffic has to be sent from one point to another which is but a very short distance by road; for example,			
Grain, Brentwood to Romford	- - - - - 7 miles	2s. 6d.	per ton.

(B.)

Clause 1. Corn or grain is warehoused free of charge at Blackwall station 14 clear days, at Brick Lane and Stratford stations 7 clear days, and at country stations 5 clear days, after carriage over the railway; after which the following scale of charges for warehouse rent comes into operation:—

Corn, grain, or seed in owner's sacks	- - - - -	½d. per quarter per week.
Ditto in company's sacks	- - - - -	1½d.

Clause 2. Corn or grain is not received at Brick Lane or Stratford stations to await order prior to being carried over the railway.

Clause 3. At Blackwall corn or grain received ex ship is warehoused 5 clear days free of charge; if, at the expiration of that time, no instructions have been received for carriage rent is charged from the date of the original delivery, upon the scale given in clause 1. There is also a charge of 1s. per ton for landing and reloading, in addition to the usual wharfage charge of 6d. per ton.

Clause 4. At country stations corn or grain is received prior to carriage over the railway, and warehoused free of charge for 5 clear days; if not removed at the expiration of that time, rent is charged from the date of the original delivery, upon the scale given in clause 1. If removed, however, without being sent over the railway at all, the charge will be 3d. per quarter per week from the date of the original delivery.

Clause 5. Grain, corn, and seed delivered at Great Eastern stations in Great Eastern sacks and afterwards forwarded to stations on foreign lines of railway. When merchants deliver grain at a Great Eastern station in Great Eastern sacks and the grain is afterwards sent to stations on foreign lines, the charge to be made for sack hire and rent is 1½d. per quarter per week, to commence the day of delivery, and parts of a week charged as a week.

Clause 6. Flour, bran, pollard, middlings, and grain offal generally, received at Brick Lane, Stratford, or Blackwall from country stations, are charged 1d. per sack (or per quarter) for warehouse rent, irrespective of time, when forming part of running stocks; but if otherwise, the charge will be ½d. per sack per week in addition to the 1d. per sack originally charged.

Clause 7. At country stations the charge is ½d. per sack per week, commencing at the expiration of 5 clear days after carriage over the railway, during which interval no charge is made.

Clause 8. Parts of a week charged as a week, both in respect to grain and flour.

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

No.

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

See notes marked E, F, G, H, I, K, L, and M, for particulars of exceptional rates.

4. Is the traffic of these articles carried at the company's risk (excepting the articles otherwise specified)?

Yes.

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time.

Within a reasonable time.

7. What time is allowed at the stations for loading and unloading this class of traffic?

The company's servants load and unload this traffic.

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

48 hours.

9. What charge for warehousing is made after the period has expired?

1st class goods 2d. per ton per day.

2nd " 3d. " "

3rd " 4d. " "

4th " 5d. " "

No demurrage is incurred.

10. What charge do you make for demurrage of waggons?

#### FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

Yes, by mutual arrangement between the respective companies.

12. Are junctions considered as stations for the traffic of articles in this return?

No, excepting when there happens to be no through rate for the traffic and in all such cases the traffic is entered at local rates to the junction.

13. If not, state the exceptions, and give an instance of each class of exception.

The traffic is forwarded to destination in due course and conveyed at local rates to the junctions most convenient of access to the railway company's system for which the traffic is intended.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

#### GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

No.

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

16. Have you any special contracts independent of the foregoing scale of charges or conditions?

Yes; for particulars, see note N.

17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.

Yes, with but very few exceptions; and then only because the route is better although longer; for example, from Peterborough to Chelmsford the traffic is carried via Stratford, although the shortest route is via Haverhill and Sudbury.

Great Eastern Railway.—Inquiry No. 3.—*continued.*

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.      The mileage rates apply to the shortest railway route.
19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars.      No, excepting where specified in this return.

„ 56 „ „ until more by weight at the rates per ton	1 0	1 2	1 4	1 6	1 8

B.

Exceptional charges are occasionally made for the collection or delivery of goods when such goods are sent in large quantities, and also in cases where such traffic forms one of the staple commodities for the accommodation of the Great Eastern district; for example, the charge for cartage of guano, packed manures, oil cake and other special class traffic, for distances, exceeding three miles and not exceeding five miles from our London goods station, is 4s. 2d. per ton.

The rates for traffic mentioned in all classes, with the exception of special and mineral, are as a rule inclusive of collection and delivery, and the explanation given in note C in respect to the charges made for cartage and other terminal services will show how such rates are made up.

C.

*Column (d).*—In regulating the charges for portorage and station accommodation the various circumstances preclude the possibility of fixing one sum as applicable to the whole of the stations on the Great Eastern railway; the charges however vary from 2s. per ton to 4s. 2d. per ton in London and from 1s. 8d. per ton to 3s. 4d. per ton in the country.

*Column (e).*—The charges for collection and delivery. The same remark will apply as given under the head of Column (d.) as to exceptional circumstances, but as a rule the charge for cartage in London varies from 3s. 4d. per ton to 7s. 6d. per ton, and in the country from 1s. 8d. per ton to 4s. 2d. per ton.

D.

The following mileage scales apply to traffic against which is remarked, “See note D,” namely,—

Fire-engines:

Engines, steam, portable:

For distances of 29 miles and under, 3d. per ton per mile, and 1s. 6d. per ton added.

For distances exceeding 29 miles, up to 45 miles, 9s. per ton.

For distances exceeding 46 miles, 2d. per ton per mile, and 1s. 6d. per ton added.

Minimum weight three tons per truck, and lowest charge 5s. per ton, at owner's risk, and exclusive of the loading and unloading.

Hay and straw:

For distances not exceeding 25 miles, 4d. per ton per mile. Minimum 5s. per ton.

For distances exceeding 25 miles, but not exceeding 50 miles, 3d. per ton per mile. Minimum, 8s. 4d. per ton.

For distances exceeding 50 miles, 2½d. per ton per mile. Minimum, 12s. 6d. per ton.

No less charge than for 30 cwt. per waggon for hay, and 25 cwt. per waggon for straw.

Contractors waggons and materials, excepting rails and chairs:

For distances 1 to 50 miles inclusive, 3d. per ton per mile.

For distances 51 to 75 miles inclusive, 12s. 6d. per ton.

For distances exceeding 75 miles, 2d. per ton per mile.

Minimum, 5s. per ton.

Locomotive engines and tenders, on their own wheels:

For distances 1 to 100 miles inclusive, 2d. per ton per mile.

For distances 101 to 133 miles inclusive, 16s. 8d. per ton.

For distances exceeding 133 miles, 1½d. per ton per mile.

Minimum 5s. per ton.

New railway waggons on their own wheels and weighing three tons and under are carried at 3d. per waggon per mile; if above three tons in weight at 4d. per waggon per mile; but if conveyed beyond 50 miles then the charge is 3d. per waggon per mile for waggons of all weights.

Returned empty packages between all Great Eastern stations except London, namely,—

For distances 1 to 30 miles, 3d. per cwt.

For distances 31 to 60 miles, 5d. per cwt.

For distances 61 to 100 miles, 6d. per cwt.

For distances 101 to 160 miles, 7d. per cwt.

Station to station, minimum 4d.

For the following no charge is made:

Ale and porter casks.

Cats meat hampers.

Cream cheese boxes.

Empty sacks.

Lime, cyster, cockle, periwinkle, whelk, bark, manure, rag, and wool bags.

Meat hampers.

Name the Stations between which the Lowest Rates for the Conveyance of Live Stock are charged, showing the Charge for each Description, and the Distances between the Stations.

Lean Sheep.—Between Norwich and all Great Eastern stations, 8d. per sheep cage per mile.

Lean Sheep.—Between Bury St. Edmunds and all Great Eastern stations, 8d. per sheep cage per mile.

Is there any special charge for Cattle to the Royal Agricultural Society's Shows? If so, state it.

THE ROYAL AGRICULTURAL SOCIETY'S SHOWS.

The conditions on which live stock and implements exhibited at the above shows will be carried over the lines of the Great Eastern Railway Company are as under :—

1st.—Live stock and implements going to the shows will be charged the full rates. If unsold, and the property of the original exhibitor, they will be returned free; but if sold, the ordinary rates must be charged on the return journey as well.

2nd.—Drovers and others in charge of live stock and travelling by the same train to pay third-class fare.

3rd.—The carriage of live stock and implements to be prepaid.

4th.—The certificate of the Society to be produced before either live stock or implements are returned free.

5th.—The Company disclaim all risk in the loading and unloading, and also in the conveyance of live stock as well as implements both to and from the shows.

6th.—No straw to be allowed in the cattle trucks; sawdust or tan may be provided and used by the senders if they wish.

Live stock, if sent in cattle trucks by goods trains, will be charged at the ordinary cattle rates. If sent in horse boxes by passenger train, the following rates will have to be charged :—

Beasts.—The ordinary horse rates.

Single Sheep or Pigs.—1d. per mile; minimum charge, 5s.

Sheep and Pigs.—5d. per box per mile if the number of sheep be more than one but under ten; if the number be in excess of ten, 10d. per box per mile. In vans on carriage trucks, 6d. per truck per mile.

The rates include the return of cattle free, if they remain unsold and the property of the original exhibitor. If sold or the owner be charged, the same rates to be charged on the return journey.

There are no through rates from Great Eastern Stations to Plymouth, therefore implements must be invoiced and sent to Brick Lane, whence they will have to be carted to the Great Western Railway Station at Paddington.

Live stock by passenger train must be sent to Bishopsgate; by goods train to Stratford or Tottenham, the senders in each case making their own arrangements for cartage across London.

### GENERAL REMARKS.

The distances over which goods traffic is carried on this line are so short, and the line itself is so circuitous that our goods rates have not been calculated at any uniform rate per mile, but have been struck to meet the competition by road. The rates quoted per mile will therefore not work out exactly correct for all our stations, an average mileage rate having been deduced as nearly as practicable from the arbitrary rates charged to the different stations.

Goods are frequently conveyed at rates less than those quoted by special agreement. We have generally to make a bargain for large consignments, we frequently take coarse traffic, such as the articles named in this list, for a minimum charge of 5s. per five ton waggon for distances under 10 miles, and 10s. per waggon for 27 miles, and intermediate distances in proportion; but always in such cases with an understanding as to the quick discharge of our waggons.

FOR ARTICLES CARRIED FROM STATION TO STATION ONLY, OR FROM JUNCTION TO JUNCTION ONLY, ON ALL YOUR LINES.

(A.) IN COMPANIES' WAGGONS, WHEN LOADED AND UNLOADED BY THE OWNERS.

2. State in the following Table the charges on your lines for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement.

Name of Article.	(a.)			(b.)		(c.)		(d.)	
	What is the Minimum Charge per Ton for each Article for the shortest Distance?	What is the Minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 27 Miles?	What is your Scale of Charges according to Distance for Distances beyond 80 Miles?	What is the Charge per Ton for Terminal or Station Accommodation?	Is it included in the foregoing Charges?	What is the Charge for Loading and Unloading when done by the Company?	Is it in addition to the foregoing Charges?
Bricks, common	1s. 3d.	5 tons	10 miles	1½d.	Our distances do not exceed 80 miles.	No charge made.	Yes.	We would not load or discharge a larger quantity than a portion of a wagon load. Smaller quantities than wagon loads (5 tons) when loaded by the company are charged at the rate of goods of the next higher class, which as well as I can average our rates would be a fourth more than the rates quoted.	Yes.

3. Are the above mileage charges uniformly applied between all stations on your system of railways?

4. If not, state the nature of the exceptions.

5. Is the traffic of this class conveyed at the owner's risk, or otherwise?

6. If not, state in what respects you depart from this condition.

7. Do you undertake to deliver this class of traffic within a specified time?

8. What time is allowed at the stations for loading and unloading this class of traffic?

9. What charge do you make for demurrage of waggons?

See under head of general remarks above.

Do. Do.

Conveyed at owners' risk if in 5 ton lots loaded and unloaded by themselves.

Small quantities under 5 tons which are charged for at the higher rate are conveyed at the risk of the company.

Yes; within 24 hours, unless we guard ourselves against liability for delay in the receipts given for the goods.

24 hours nominally is the time allowed, but we cannot enforce demurrage. The unreasonable detention of our waggons is one of the chief difficulties which we have to contend with.

Belfast and County Down Railway.—Inquiry No. 1.—*continued.*

## (B.) IN OWNERS' WAGGONS.

10. State in the following Table the charges on your own line for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement.

Nothing done in owner's waggons.

## FOR THROUGH TRAFFIC, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

17. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions?

18. Are junctions considered as stations for this class of traffic?

19. If not, state the exceptions?

20. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

Our traffic is all local.

## CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

21. Have you any scale of charges applicable to contracts? If so,—

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

22. Have you any special contracts independent of the foregoing scale of charges or conditions?

We have no contracts for goods traffic.

Answered under general remarks above.

## INQUIRY No. 2.—Questions in regard to Railway Charges.

## GENERAL REMARKS.

This line being exposed to competition by road over its whole length, special bargains have frequently to be made for heavy consignments at rates much below those quoted.

At company's risk.

No; but we run daily goods trains.

24 hours nominally, but we cannot enforce demurrage.

We seldom can enforce any charge; 24 hours nominally.

No fixed charge.

See No. 7; 3s. per day nominally, but we cannot enforce it.

## FOR THROUGH TRAFFIC.

11 Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

All our traffic is local.

Belfast and County Down Railway.—Inquiry No. 2.—*continued.*

12. Are junctions considered as stations for the traffic of articles in this return? All our traffic is local.
13. If not, state the exceptions, and give an instance of each class of exception. Ditto.
14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given? Ditto.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,— No.
- a. Is the charge based on a minimum annual payment, or on the quantity carried?
- b. Or how otherwise?
16. Have you any special contracts independent of the foregoing scale of charges or conditions? Having to compete with the road over the whole of our system we have several special rates, chiefly with flax mills, at lower rates than those quoted, but wherever such is the case the rates are open to all parties similarly circumstanced. See No. 11.
17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.
18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply. Ditto.
19. Are any articles in this class ever carried in owners' waggons? If so, state the particulars. No.

Returned empty packages.	- - -	1d. to 6d. according to size.									
Small parcels	- - -	6d. for any quantity which at tonnage rates would not amount thereto.									

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

As nearly as I can average, our rates not being calculated on any fixed mileage principle.

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

4. Is the traffic of these articles carried at the company's risk (excepting the articles otherwise specified)?

All at company's risk.

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

No, but we have daily goods trains.

7. What time is allowed at the stations for loading and unloading this class of traffic?

24 hours nominally.

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

24 hours nominally, but we seldom can enforce any charge.

9. What charge for warehousing is made after the period has expired?

No fixed charge.

10. What charge do you make for demurrage of waggons?

3s. per waggon per day nominally, but it cannot be enforced.

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

All our traffic is local.

12. Are junctions considered as stations for the traffic of articles in this return?

Ditto.

13. If not, state the exceptions, and give an instance of each class of exception.

Ditto.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

Ditto.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

Having to compete with the roads over the whole of our system, we have several special rates chiefly with the owners of spinning mills at lower rates than those quoted, but wherever such is the case the rates are open to all parties similarly circumstanced.

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

No.

16. Have you any special contracts independent of the foregoing scale of charges or conditions?

See No. 11.

17. Is the traffic in all cases sent by the shortest railway route in connection with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.

See No. 11.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

No.

19. Are any articles in this class ever carried in owners' waggons? If so, state the particulars.

**INQUIRY No. 6.—As to Rates for Parcels.**

Give, in reference to the lines included in your former Returns, the general rates charged for parcel traffic, both by passenger and goods trains, according to weight and distance.

Also add particulars of any important exceptions made to these general rates.

By Passenger Trains.	Parcels.				
	Under 3 lbs.	3 lbs. to 13 lbs.	14 lbs. to 27 lbs.	28 lbs. to 56 lbs.	And for every 14 lbs. or fraction of 14 lbs. above 56 lbs.

23 to 33 " - - - - -	0 4	0 6	0 8	0 10	0 2

Every fraction of a mile is counted as a mile.

These rates include delivery in Belfast within the Municipal Lamps, and within the Lamps of Ballymacarrett, or collection from Town Office (2, Donegal Street). Delivery to the distance of half a mile beyond the Lamps, 3d. extra. Parcels must be delivered at the Parcels Booking Office, five minutes before the departure of each train.

Exceptions:—

Daily newspapers' parcels to all stations - - - - - 7l. per annum.  
Tri-weekly newspapers' parcels to all stations - - - - - 4l. „

By goods train:—

Small parcels not usually carried by goods trains, as all goods traffic on this line is subject to a minimum charge of 6d.

3s. per day under Clearing House regulations, but it is rarely enforced.

Ulster Railway.—Inquiry No. 1.—*continued.*

(B.) IN OWNERS' WAGGONS.

10. State in the following Table the charges on your own line for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement. [Same Table as (A.)]

No waggons belonging to private owners are being used on the Ulster Railway.

FOR THROUGH TRAFFIC, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

17. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions?

Yes.

18. Are junctions considered as stations for this class of traffic?

The junctions are at stations in all cases.

19. If not, state the exceptions?

20. What arrangements are made for the interchange of traffic with other companies, when through charges are not given.

Local charges are made to the junction stations, and goods are either passed by transhipment or in the waggons as mutually convenient for the companies.

CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

21. Have you any scale of charges applicable to contracts? If so,—

No.

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

22. Have you any special contracts independent of the foregoing scale of charges or conditions?

No.

Give some general information as to the nature and extent of your special excursion traffic, stating the frequency of the excursion trains; the places between which they run; the fares charged per mile for each class; the number of passengers of each class generally carried in each train; and the average speed, including stoppages.

During the summer season of 1866 excursion tickets were issued on Saturdays by the 10.30 a.m. up ordinary train from Belfast to Dublin at the following average fares per mile, viz.:—

First Class, 1·11d. Second Class, 0·85d. Third Class, 0·56d.  
but on the average only 3 first class, 3½ second class, and 18½ third-class passengers travelled per train.

These trains were run at an average speed, including stoppages, of 19 miles per hour, and during the same period third-class excursion trains were arranged to run fortnightly both ways between Belfast and Clones, and Belfast and Omagh, at an average speed, including stoppages, of about 22 miles per hour, and carried on the average per train between Belfast and Clones 506 passengers at an average fare of 0·25d. per mile, and between Belfast and Omagh 441 passenger at an average fare of 0·26d. per mile.

Special excursion trains for work people are also run from Belfast to stations in the country at the following scale of fares, viz.:—

3. Are the above mileage charges uniformly applied between all stations on your system of railways?

4. If not, state the nature of the exceptions.

I have endeavoured to give a fair average, but the rates given will not apply in all cases.

The following are a few of the exceptions:—

Coals.—Derry to Coleraine, 33 miles, 2s. per ton; Belfast to Ballymoney, 54 miles, 4s. per ton.

Gravel and Sand.—Toome to Belfast, 36 miles, 2s. per ton.

Freestone.—Cookstown to Belfast, 54 miles, 3s. 6d. per ton.

Broken stones.—Castlerock to Londonderry, 28 miles, 1s. 9d. per ton.

Belfast and Northern Counties Railway.—Inquiry No. 1.—*continued.*

5. Is the traffic of this class conveyed at the owner's risk, or otherwise? At owner's risk.
6. If not, state in what respects you depart from this condition.
7. Do you undertake to deliver this class of traffic within a specified time? No.
8. What time is allowed at the stations for loading and unloading this class of traffic? Twenty-four hours is the time allowed, but it is generally detained longer, and it is with great difficulty we can obtain any charge for demurrage.
9. What charge do you make for demurrage of waggons? Three shillings per diem.

## (B.) IN OWNERS' WAGGONS.

For the whole of the articles included in this list see Table (A.), except Salt in *bulk*.

10. State in the following Table the charges on your own line, for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement :—

Salt, rock, and unmanufactured.	10d.	5 tons . . .	9 miles . . .	We only carry salt rock from Duncrue to Belfast.			

- 10d. Do the charges include returning empty waggons? Yes.
11. Are the above charges uniformly applied between all stations on your system of railways? We only carry salt rock in owners' waggons.
12. If not, state the nature of the exceptions.
13. Is the traffic of this class conveyed at the owner's risk, or otherwise? At owner's risk.
14. Do you undertake to convey this class of traffic within a specified time? Yes.
15. And to return the empty waggons within a specified time? Yes.
- And if so, in what time? The same day as loaded.
16. Do you allow demurrage on owners' waggons when not returned within the specified time? No.

## FOR THROUGH TRAFFIC, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

17. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? Through charges are made with the companies named, but we have no junction with any other lines.
18. Are junctions considered as stations for this class of traffic? Yes.
19. If not, state the exceptions.
20. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

## CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

Goods classified at owners' risk to be charged 25 per cent. more than the above rates when conveyed at the companies' risk.

The carriage of goods is to be charged at the tonnage rates according to the classification, no less charge being made than the following, viz.:—For any distance under 25 miles, 6d; 25 to 40 miles, 9d; above 40 miles, 1s.

The rates do not include cartage either to or from the stations. Any fractional part of a ½ cwt. is to be charged as a ½ cwt.; any fractional part of a penny to be reckoned as a penny; and any fractional part of a mile is to be reckoned as a mile.

The charges for storage will be—For every week or part of a week, after forty-eight hours, second class goods, 6d. per ton; third class goods, 9d. per ton; fourth class goods, 1s. per ton; fifth class goods, 1s. 6d. per ton; and sixth class goods, 2s. per ton.

When small packages of goods accompany other goods of a higher class they must be weighed and charged along with them. When they accompany other goods of a lower class they must be charged for at their actual weight in their own class, no less charge than 6d. being made. When they are from a different sender they must be charged separately.

When goods are liable to be charged in two classes according to the quantity forwarded, the charge at the higher rate is not to exceed that which would be made for a consignment of heavier weight entitled therefrom to be carried at the lower charge, but the latter calculation is in such instances to be applied.

RATES OF CHARGE FOR RETURNED EMPTIES.

1. All returned empties (excepting brewers' empties, vitriol bottles, empty sacks, and empty bottles), are to be charged by weight in 3rd class.

2. Brewers' returned empties are to be charged at the following rates:—

Quarter cask	-	-	-	-	-	1½ d. each.
Half cask	-	-	-	-	-	2 "
Barrel	-	-	-	-	-	3 "
Hogshead	-	-	-	-	-	4 "

3. Returned empty bottles, sacks, packs, and wrappers, are to be charged by weight in 2nd class.

4. Minimum charge, 2d.

The carriage of returned empties is to be prepaid except when they are of sufficient value to leave no doubt of their being released by consignees, but in no case must any money be paid out upon them.

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

3. If not, state the nature of the exceptions, and give an instance of each class of exceptions.

4. Is the traffic of articles in this return conveyed at the owner's risk, or otherwise?

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

7. What time is allowed at the stations for loading and unloading this class of traffic?

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

9. What charge for warehousing is made after the period has expired?

10. What charge do you make for demurrage of wag-gons?

As near as may be having regard to competition and local circumstances.

At company's risk, except by special agreement.

No; but we have goods trains daily to all stations.

Twenty-four hours. It is however much longer in practice.

Forty-eight hours.

We have no specified charge.

Three shillings per day, but rarely enforced.

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

12. Are junctions considered as stations for the traffic of articles in this return?

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

Yes; no exceptions.

Yes.

No exceptions.

Through charges in all cases.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

- Is the charge based on a minimum annual payment, or on the quantity carried?
- Or how otherwise?

No.

Belfast and Northern Counties Railway.—Inquiry No. 2.—*continued.*

16. Have you any special contracts independent of the foregoing scale of charges or conditions? No.

17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions. Yes.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply. Yes.

19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars. No.

INQUIRY No. 4.—As to Acts of Parliament authorizing Tolls and Rates.

Give a list of the Acts of Parliament now in force, under which you are authorized to levy tolls and rates on the lines included in your former return :—

The Belfast and Ballymena Railway Act, 1845, 8 & 9 Vict. c. 81.  
 The Belfast and Ballymena Extension Act, 1853, 16 & 17 Vict. c. 68.  
 The Ballymena and Portrush Railway Act, 1853, 16 & 17 Vict. c. 80.

NOTE.—The above now form the Belfast and Northern Counties Line (100 miles).

Lines worked by the Belfast and Northern Counties Company, viz. :—

The Londonderry and Coleraine Railway Act, 1845, 8 & 9 Vict. c. 187.  
 The Carrickfergus and Larne Railway Act, 1860, 23 & 24 Vict. c. 54.

Places between which the highest rate of passenger fare is charged, giving the fares for each class, and the distances between the stations.

The calculation is based upon the fares between Belfast and Ballymena. 1st class, 5s. 10d.; 2nd class, 4s.; 3rd class, 2s. 6d.; 1st return, 8s. 9d.; 2nd return, 6s.; 3rd return, 3s. 9d. Distance, 33 miles.

Places between which the lowest rate of passenger fare is charged, giving the fares for each class, and the distances between the stations.

The calculation is based upon the fares between Belfast and Antrim. 1st class, 3s. 2d.; 2nd class, 2s. 5d.; 3rd class, 1s. 6d.; 1st return, 4s. 9d.; 2nd return, 3s. 8d.; 3rd return, 2s. 3d. Distance, 21½ miles.

Are market tickets issued? If so, between what places, and at what proportion of the single fares?

Ballyclare and Ballynure to Belfast every Friday, and on fair days (monthly).

Stations on Cookstown branch to Magherafelt every Thursday, and Cookstown every Saturday, and to Moneymore monthly on fair days. From Toome to Randalstown every Wednesday; Ballymena, Glarryford, Bellaghey and Dunloy to Ballymoney on Thursdays, and from Glarryford, Bellaghey, Dunloy, and Ballymoney to Ballymena on Saturdays. Larne to Ballymena on Friday evening available for return up to Monday.

Ballykelly and Carricue every Wednesday and Saturday to Derry; 3rd class only.

The above are issued by all classes at single fares.

Give the average speeds of trains as follows :—

Average speed of express trains, including stoppages	-	-	-	32 miles per hour.
" " ordinary passenger trains	-	-	-	24
" " parliamentary	-	-	-	No special Parliamentary trains.

Give some general information as to the nature and extent of your special excursion traffic, stating the frequency of the excursion trains, the places between which they run, the fares charged per mile for each class, the number of passengers of each class generally carried in each train, and the average speed, including stoppages.

We have been in the habit of carrying most of our excursion passengers by the ordinary trains.

Excursion tickets are issued throughout the summer from all stations to Portrush, a watering place, and only seven miles from the Giant's Causeway.

Excursion tickets are issued about four times a year from the principal stations on the line to Belfast.

Excursion tickets are issued whenever there is any special attraction at Belfast or any other place on the line.

The average excursion fares are, 1st class, about ½d. per mile; 2nd class, ¾d.; 3rd class, ¼d. per mile.

**INQUIRY No. 6.—As to Rates for Parcels.**

Give, in reference to the lines included in your former returns, the general rates charged for parcel traffic, both by passenger and goods trains, according to weight and distance. Also add particulars of any important exceptions made to these general rates.

### INQUIRIES, Nos. 2 and 3.

SIR,  
Dublin, Wicklow, and Wexford Railway Company.  
Secretary's Office, 48 Westland Row, Dublin, 22nd September 1865.  
REFERRING to your letter of 31st August ult., and the duplicate forms sent therewith. I have carefully considered the matter and find that the fact of our classification of goods differing a good deal from that in use on the English railways, renders it most difficult, if not quite impossible, to fill up the forms you send. I forward you, however,—

- i. The Irish classification of goods.
- ii. Table of distances.
- iii. Schedule of goods rates.
- iv. General remarks bearing on the queries in your forms.

I think that in this way I furnish you with fuller and more satisfactory information than I could do by attempting literally to comply with your wish as to filling up the forms. If, however, you require any explanations or further information, I shall do my best to supply both, it being the wish of this company to afford the Royal Commission the fullest facilities for forming a judgment upon the railway question.

W. Pole, Esq., Secretary, Royal Commissioners on Railways,  
House of Lords, Westminster, S.W.

I am, &c.,  
E. W. MAUNSELL,  
Secretary.

#### i. CLASSIFICATION OF GOODS.

##### FIRST CLASS.

First class goods are to be conveyed in open waggons, and are to be loaded, conveyed, and unloaded, at the risk and expense of the owners. If not removed within twenty-four hours after arrival per train, demurrage is to be charged for each waggon detained by them, at the rate of 3s. for every day, or part of a day, after the twenty-four hours, Sundays, Christmas Day, and Good Friday excepted.

Goods in this class (except sea-weed) when sent in quantities of less than five tons are to be charged at second class rates.

\* Bark to be charged at a minimum weight of three tons to each waggon. Should more than three tons be loaded in one waggon, the charge is to be made for the actual weight. Bark (loose) to be loaded and unloaded by the owners, and the waggons to be subject to demurrage, the same as in first class.

† When deals and boards (except mahogany and veneers), or iron and steel, in bars and rods, above 13 feet long, can be loaded in ordinary goods or cattle waggons, the same rate may be charged as if they were only 13 feet long. When two or more waggons are required for the conveyance of shafts, iron girders, long timber, and such like articles, they are to be charged for specially at the rate of one ton to each waggon, if the actual weight does not amount to that.

‡ Bog wood to be charged at a minimum weight of two tons to each waggon, and to be loaded and unloaded by the owners. The waggons to be subject to demurrage, the same as in first class. Should more than two tons be loaded in one waggon, the charge is to be made for the actual weight.

§ Osiers to be charged at a minimum weight of three tons to each waggon. Should more than three tons be loaded in one waggon, the charge is to be made for the actual weight.

|| Peat to be charged at a minimum weight of two tons to each waggon, and to be loaded and unloaded by the owners. The waggons to be subject to demurrage the same as in first class. Should more than two tons be loaded in one waggon the charge is to be made for the actual weight.

\* When sent in quantities of three tons and upwards, to be charged at second class rates.

† When Deals and Boards (except Mahogany and Veneers), or Iron and Steel, in rods and bars, above 13 feet long, can be loaded in ordinary Goods or Cattle Waggons, the same rate may be charged as if they were only 13 feet long. When two or more Waggons are required for the conveyance of Shafts, Iron Girders, Long Timber, and such like articles, they are to be charged for specially at the rate of one ton to each Waggon, if the actual weight does not amount to that.

‡ Mode of ascertaining the number of cubic feet in a tree or log of round Timber:—

Find the average girth in feet of the piece, which divide by 4. The square of the fourth of the girth multiplied by the actual number of feet in length will give the number of cubic feet, which, when divided by 40 (the number of cubic feet per ton) in the case of Oak, Teak, Beech, Ash, and Elm, or by 50 in all other descriptions of Timber, will give the weight in tons.

§ Turf to be charged at a minimum weight of two tons to each Waggon, and to be loaded and unloaded by the owners. The Waggons to be subject to demurrage, the same as in First Class. Should more than two tons be loaded in one Waggon, the charge is to be made for the actual weight.

|| Twigs to be charged at a minimum weight of three tons to each Waggon. Should more than three tons be loaded in one Waggon, the charge is to be made for the actual weight.

Dublin, Wicklow, and Wexford Railway.—Inquiries Nos. 2 and 3—*continued*.

## iv. GENERAL REMARKS.

The Dublin, Wicklow, and Wexford Railway Company submits to the Royal Commission the accompanying compilation denominated "Classification of Goods," [pp. 265, 267] used generally by the railway companies in Ireland, associated in the Irish Railway Clearing House, by means of which the principles adopted in the conduct of the company's goods traffic may be best understood.

The various articles of merchandize are therein respectively classified.

The charge made for conveyance of each article is according to the class in which the article is placed; and it follows that there is a different rate of charge fixed for each of the several classes.

The ordinary lists of rates for merchandize thus classified, and table of distances from station to station, also accompany this statement, [pp. 268, 269] and these, with the following additional particulars, give the Commission, in fact, all the information on the subject that the company itself possesses.

The "minimum charge per ton for each article for the shortest distance," is shown on the lists of rates, and quantities less than a ton are charged proportionately at the same rate, subject to a minimum charge as follows:—

						<i>s.</i>	<i>d.</i>
For any distance under 25 miles	-	-	-	-	-	0	9
25 to 50 "	-	-	-	-	-	1	0
51 to 100 "	-	-	-	-	-	1	3
101 to 150 "	-	-	-	-	-	1	6
above 150 "	-	-	-	-	-	2	0

The rates generally cover terminal expenses and loading and unloading by the company, except on 1st class goods; and these are steadily loaded and unloaded by the owners, but the company's servants nevertheless usually assist.

The goods traffic is ordinarily transmitted at the risk of the company, with the exception of articles in 1st class, which are conveyed at the risk of the owners.

The practice of the company is to deliver daily, at the destination stations, the traffic which has been forwarded on the previous day to the company for transmission.

The loading is usually performed at the time of the delivery of the goods to the company for conveyance, and the unloading commences quickly after their arrival at the inwards station. 24 hours are, however, allowed for the unloading of 1st class goods.

Warehousing is given for 24 hours free of charge; and where the company have ample accommodation, its customers obtain storage without charge for a lengthened period.

Demurrage of waggons is subject to be charged at the rate of 3s. per day or part of a day, after 24 hours subsequent to arrival of train. Sundays, Christmas Day, and Good Friday excepted. But the charge is rarely or ever made.

The service of collection and delivery is performed by an agent of the company at the following rate, but the charge is not made unless the work is actually done:—

In Dublin, up to 8 cwt., 3d. per cwt.
" 8 cwt. to 1 ton, 2s.
In the country, 1s. per ton.
Minimum charge, 3d., which covers 5 cwt.

The railway of this company does not form a junction with that of any other company, and several queries of the Commission are therefore inapplicable.

## INQUIRY No. 4.—As to Acts of Parliament authorizing Tolls and Rates.

Give a list of the Acts of Parliament now in force, under which you are authorized to levy tolls and rates on the lines included in your former return.

REGULATIONS.

1st. Live stock is to be charged by the waggon or half-waggon, according to the above rates.

2nd. The sender may load as many head in each waggon as he may think fit, but the company will, in no case, be responsible for any injury to live stock that may arise from over-loading.

3rd. The "rate per waggon" to be charged whenever the number loaded in the waggon exceeds the following, viz.:—four head of fat or full-grown cattle, five head of small cattle, ten calves (under two months old), fourteen sheep or pigs, or eighteen lambs.

4th. The "rate per half-waggon" to be charged whenever the number loaded in the waggon does not exceed the above.

5th. When only half a waggon is charged, the company to have the option of making use of the remaining half for conveying other live stock.

6th. All charges must be prepaid, and the live stock must be unloaded and removed from the company's premises immediately the waggons arrive at the place for unloading.

7th. Drivers in charge of stock will be charged half third-class fares, one being permitted to travel with each truck or half-truck.

8th. The company do not pledge themselves to the arrival of the cattle trains at any given time; neither do they hold themselves liable for any injury or damage occurring to live stock while on the Dublin, Wicklow, and Wexford Railway; and they undertake the conveyance of it only on condition that they be free from all risk and responsibility.

9th. Parties forwarding stock are requested to give the station master twenty-four hours previous notice for the supply of waggons.

Name the stations between which the highest rates for the conveyance of live stock are charged, showing the charge for each description, and the distances between the stations.

Dublin, Harcourt Street, and Enniscorthy; distance 77½ miles.  
For other particulars see above.

Name the stations between which the lowest rates for the conveyance of live stock are charged, showing the charge for each description, and the distances between the stations.

Dublin, Harcourt Street, and Shankill; distance 9½ miles.  
For other particulars see above.

Is there any special charge for cattle to the Royal Agricultural Society's shows? If so, state it.

None to the shows. Any returning from the shows unsold are carried free at owner's risk.

## FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions. Yes.
12. Are junctions considered as stations for the traffic of articles in this return? Yes.
13. If not, state the exceptions, and give an instance of each class of exception. Yes.
14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given? Delivered over to the connecting company.

## GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,— Not.
- a. Is the charge based on a minimum annual payment, or on the quantity carried? Not.
- b. Or how otherwise? See above reply.
16. Have you any special contracts independent of the foregoing scale of charges or conditions? Not.
17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions. Yes.
18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply. Yes.
19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars. No.

Great Southern and Western Railway of Ireland.—Inquiry No. 5.—*continued.*

Places between which the highest rate of passenger fare is charged, giving the fares for each class, and the distances between the stations.

Kilkenny and Tralee, 224½ miles.

2nd " "	-	-	-	-	46	0
3rd " "	-	-	-	-		Nil.

The above-named stations and fares are quoted in accordance with the request contained in the printed heading, the greatest distance on the Great Southern and Western Railway from station to station being 224½ miles; but owing to the long distance, the geographical position of the two towns, and the fact that they are the terminal stations of different branch lines, the actual passenger traffic is quite nominal. The average passenger traffic is for distances under 60 miles.

Places between which the lowest rate of passenger fare is charged, giving the fares for each class, and the distances between the stations.

Lucan and Hazlehead, 3 miles.

					<i>s.</i>	<i>d.</i>
1st class single fare	-	-	-	-	0	8

1st class return fare	-	-	-	-	1	0
2nd " "	-	-	-	-	0	9
3rd " "	-	-	-	-		Nil.

The above-named stations and fares are given in accordance with the request contained in the printed heading, the shortest distance on the Great Southern and Western Railway from station to station being 3 miles. The places named being unimportant road-side stations, the actual passenger traffic is limited.

Are market tickets issued; if so, between what places, and at what proportion of the single fares?

No such tickets issued on Great Southern and Western Railway.

Give the average speeds of trains as follows:—

Average speed of mail trains, including stoppages	-	-	-	-	30½	per hour.
" ordinary passenger trains, "	-	-	-	-	24½	"
" parliamentary " "	-	-	-	-	20½	"

Give some general information as to the nature and extent of your special excursion traffic, stating the frequency of the excursion trains, the places between which they run, the fares charged per mile for each class, the number of passengers of each class generally carried in each train, and the average speed, including stoppages.

I. The extent of the receipts for passenger excursion traffic, as also the number of special trains are both subject to considerable fluctuation, depending much on the state of the weather, and influenced by local and special attractions which from time to time arise.

II. The more important excursion trains are, as a rule, to and from the terminal stations, viz.:—

Dublin to Cork, and vice versa.  
Do. to Limerick, "  
Do. to Killarney, "  
Do. to intermediate stations, and vice versa.  
Cork to Limerick, and vice versa.  
Do. to Killarney, "  
Do. to intermediate stations, and vice versa.

III. The excursion return fares range at various reductions on the ordinary return fares, say from 30 to 60 per cent., according to circumstances and distances.

IV. The number of passengers carried in excursion trains are found to vary according to the number of stations booking and the distance travelled by the respective excursion trains.

1st class return from 20 to 150 passengers per train.  
2nd " " 20 to 100 " "  
3rd " " 100 to 500 " "

V. Some of the excursion trains have 1st, 2nd, and 3rd class carriages attached, but the greater number of such trains have only 1st and 3rd class carriages.

INQUIRY No. 6.—As to Rates for Parcels.

Give, in reference to the lines included in your former returns, the general rates charged for parcel traffic, both by passenger and goods trains, according to weight and distance. Also add particulars of any important exceptions made to these general rates.

Great Southern and Western of Ireland Railway.—Inquiry No. 6.—*continued*:

I. No parcels under 28 lbs. are accepted by goods trains unless they form part of other consignments, and all parcels or consignments, whether above or below 28 lbs. and sent by goods trains, are charged at the general goods tonnage rates.

II. The company's agent is allowed 2d. for collection and 2d. for delivery for each parcel, making a total of 4d. on each parcel, which the company pay to the agent out of the above rates charged to the public by passenger trains.  
There are no important exceptions to the general parcel rates.

GENERAL REMARKS.

I. The rates given above for passengers, for horses, and for carriages are worked out per mile per passenger, per mile per horse, and per mile per carriage, in accordance with the printed instructions.

II. As regards oxen and sheep, the rates are given per mile per waggon, as rates per head are not charged for this description of traffic.

III. The rates for goods are given per ton for the longest distance, viz., 56 miles, being the rates struck at the opening of the Great Southern and Western Railway in August 1846, in accordance with the printed instructions. As the object of the other two columns (headed 1850 and 1865) would appear to be to arrive at a comparison of goods rates in operation at the different periods quoted, the goods rates per ton set forth in each column refer only to the distance of 56 miles.

3. Are the above mileage charges uniformly applied between all stations on your system of railways?

They vary according to circumstances.

4. If not, state the nature of the exceptions.

The exceptions are when it is found necessary to obtain the traffic at special lower rates than the ordinary tariff, but this applies principally to cargoes or large quantities.

5. Is the traffic of this class conveyed at the owner's risk, or otherwise?

As a rule it is carried at owner's risk.

6. If not, state in what respects you depart from this condition.

According to circumstances, and in respect to damage where it proceeds from circumstances beyond the control of senders.

Waterford and Limerick Railway.—Inquiry No. 1.—*continued.*

7. Do you undertake to deliver this class of traffic within a specified time? Lowest specific time for delivery, but generally 24 hours.
8. What time is allowed at the stations for loading and unloading this class of traffic? 24 hours.
9. What charge do you make for demurrage of waggons? 3s. per day after 24 hours.

## (B.) IN OWNERS' WAGGONS.

10. State in the following Table the charges on your own line for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement:—  
Not carried in any but companies' waggons.

## FOR THROUGH TRAFFIC IN COMPANIES' WAGGONS.

17. Do you make through charges for this class of traffic with all other railway companies connected with your system of junctions? We have through rates for this class of traffic with other companies.
18. Are junctions considered as stations for this class of traffic? Yes.
19. If not, state the exceptions? None.
20. What arrangements are made for the interchange of traffic with other companies, when through charges are not given? If there is a ton weight or upwards the waggon is passed on to the foreign company's line. When less than that quantity it is discharged at the junction, when the first charge becomes a "paid on" on the foreign line.

## CONTRACT CHARGES IN COMPANIES' WAGGONS.

21. Have you any scale of charges applicable to contracts? None.  
If so,—
- a. Is the charge based on a minimum annual payment, or on the quantity carried? None.
- b. Or how otherwise? None.
22. Have you any special contracts independent of the foregoing scale of charges or conditions? None.

London Chatham and Dover Railway.—Inquiry No. 6.—*continued.**Ordinary Parcels above 112 lbs. weight.*

For distance up to 21 miles, for every additional 7 lbs., 1d. extra.  
 " over 21 " " 2 lbs., 1d. "

*Van Parcels* over 112 lbs., two-thirds the rate for ordinary parcels.

The van parcels are conveyed daily, and will be forwarded by the parliamentary train every morning (Sundays excepted), they are required to be taken to the Company's Parcels Office, Victoria Station, before 7 o'clock, and to the receiving houses in London and the country stations before 5 o'clock the previous evening.

All packages intended to be forwarded as van parcels at the reduced rate of charge, must be legibly marked "Van Parcels Train," or they will be sent by the ordinary passenger trains, at the usual rate of charge for parcels.

The rates above mentioned are inclusive of booking (except at Victoria and the receiving houses), and of collection from the receiving houses, and delivery within 2½ miles of Somerset House, and at the country stations where delivery is customary, within a mile of the station.

*Packed Parcels, &c.*—Parcels tied together, packed in a hamper, in sacks, or otherwise packed, unless *bonâ fide* the property of one person, will be charged double the above rates.

*Returned Empty Packages, &c.*—Threepence per package (which must be prepaid) will be charged for returned empties, exclusive of collection or delivery; and the date when it was conveyed must fully be written on each package, or it will not be received. Half the ordinary parcels rates will be charged for packages containing empty bottles. The charge for collection and delivery of empty packages within the London district will be 3d. for collection and 4d. for delivery of each package—to be prepaid.

*Fragile Parcels.*—Parcels are conveyed at owner's risk only, unless upon payment of an additional charge of half the ordinary rates for parcels under 10l. value. For parcels above that value, see Special Rate hereunder.

*Insurance Rate* for articles comprised in the notice under Carriers' Act, exhibited at the company's stations, over and above the ordinary rate of carriage:—

For any distance not exceeding 50 miles, for each pound sterling in value, the sum of	½d.
" " 75 " " " "	¾d.
" " 100 " " " "	1d.
" " 150 " " " "	1½d.

An additional farthing per pound sterling for every increase of distance not exceeding 50 miles, and the same for every increase of distance upon each additional 50 miles completed over and above the first 150 miles.

N.B.—When the value of the property to be insured shall exceed 250l., a reduction in the above specified rates may be made by special contract.

*For Milk.*

	Per Imperial Gallon.	Cases containing 9 Gallons and less.
	s. d.	s. d.
Under 10 miles	0 0½	0 6
Over 10 and under 25	0 0½	0 9
Over 25 and under 50	0 1	1 0
Above 50 miles	0 1½	1 4

Empty cans returned free. The cans to be stamped or marked with the number of gallons.

*Fish.*—For any distance under 21 miles, ordinary parcels rates; for any distance over 21 miles, and for any quantity under 56 lbs., ordinary parcels rates; and for any quantity over 56 lbs., 4s. per cwt. Between the stations on the main line from Victoria to Chatham, both inclusive, the ordinary parcels rates.

*Hat Boxes* containing a single hat, 6d. each; packed in crates or tied together, 3d. each; with minimum charge of 1s., irrespective of distance.

*Newspapers and Unbound Periodicals to and from all Stations.*

A single newspaper	-	-	-	-	1d.
Parcels of newspapers or unbound periodicals, up to 6 lb. weight	-	-	-	-	3d.
Above 6 lbs. and not exceeding 14 lbs.	-	-	-	-	6d.
For every additional 7 lbs.	-	-	-	-	1d.

These charges include booking but not delivery, and the parcels must be open at both ends.

Every fraction of a pound weight is charged as a full pound, and every fraction of a penny as a full penny.

All parcels up to 112 lbs. will be forwarded by passenger trains, unless "per goods train" be distinctly marked upon them.

All parcels are carried under the conditions exhibited at the company's station.

Parcels intended to be conveyed by any particular train must be deposited in the company's parcels office 15 minutes before the departure of the train.

*Rates for Small Packages and Parcels by Goods Trains.*

The following Rates on parcels and packages, not exceeding 112 lbs. weight, include cartage to and from all places within the limits of the borough of Southwark and City of London, and delivery in the country (wherever the company have vehicles for that purpose) to distances not exceeding one mile from stations, but not collection. Beyond the limits of the Borough of Southwark and City of London, an extra charge will be made for cartage, according to distances.

		If conveyed distances			
		Not exceeding 25 miles.	Not exceeding 46 miles.	Exceeding 46 miles.

(B.) IN OWNERS' WAGGONS.

10. State in the following Table the charges on your own line for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement :—  
All rolling stock belongs to this company.

FOR THROUGH TRAFFIC, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

17. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions?

18. Are junctions considered as stations for this class of traffic?

19. If not, state the exceptions.

20. What arrangements are made for the interchange of traffic with other companies when through charges are not given?
- Yes, in companies' waggons.

Yes.

See reply 18.

Each company delivers at the junction of the other company. A load less than two tons is transhipped. A waggon with more than two tons is sent through to destination of its contents.

CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

21. Have you any scale of charges applicable to contracts? If so,—

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

22. Have you any special contracts independent of the foregoing scale of charges or conditions?
- No.

No.

ACTS OF THE IRISH PARLIAMENT.		
A.D. 1715.	2 Geo. I. c. 12 -	Certain persons therein named as undertakers were empowered at their proper cost and charges to make the river Shannon navigable from Limerick to Carrick-drumsuck, with such powers as to valuations, juries, &c., &c., as in said Act particularized, and certain persons or any seven of them were appointed Commissioners to adjust difficulties between these undertakers and the owners of lands. And certain persons were also authorized to make other rivers therein mentioned navigable and to levy tolls and fares, with power to appoint deputies and agents under hand and seal.
1721.	8 Geo. I. c. 6 -	The quorum of Commissioners reduced to five, and the appointments of deputies and agents to be signed by five Justices of the Peace or Members of Parliament, and a memorial thereof to be entered in the Registry Office.
1729.	3 Geo. II. c. 3 -	The undertakers were superseded by the appointment of Commissioners for exercising the powers in said former Acts mentioned, and a public fund (viz., certain tillage duties) was thereby appointed and set apart for carrying on the works.
1749.	23 Geo. II. c. 5 -	The Commissioners in said 2 Geo. I., named, to have the same powers as before for adjusting differences.
1751.	25 Geo. II. c. 10 -	The Commissioners named in 3 Geo. II. were erected into a body corporate or Board of Inland Navigation (as it was usually called) with a seal and name, and the same powers, &c. as the undertakers and Commissioners in the former Acts mentioned, and to lay out roads, from coal or other mines to the canal, and to make rivers navigable and canals between rivers; the said corporation for promoting inland navigation to have powers to appoint under their seal three of their members to treat for lands to be made use of for the navigations.
1755.	29 Geo. II. c. 10 -	Empowers the Board of Inland Navigation to appoint persons to treat with the owners of lands and agree with them.
1772.	11 & 12 Geo. III. c. 4 -	The public fund created by 3 Geo. III. continued; and as the method of carrying on inland navigations altogether at the expense of the public was found inconvenient and attended with delay, private subscribers were to be encouraged to undertake such works at their own expense. The Board of Inland Navigation were empowered to transfer the property of a navigation with its soil, banks, houses, tolls, duties, and all other matters appertaining thereunto unto any private company of undertakers willing to carry on such a work.
	11 & 12 Geo. III. c. 25 -	The undertakers for carrying on inland canals or navigations were empowered to take leases for canal purposes of lands and of strips of ground and on red bogs 20 perches on each side of the edge of the canal.
	11 & 19 Geo. III. c. 31 -	Certain subscribers were incorporated by the name of the company of <i>Undertakers of the Grand Canal</i> to have perpetual succession and a common seal for carrying on and completing a canal from Dublin to the Shannon, and from such canal to the Barrow, and from Dublin to the Liffey, together with the navigation of the Barrow from its sources to Athy, and such off branches as might be necessary, with such powers as were vested in the Board of Inland Navigation by the former Acts, and to be capable in law to purchase and take lands, &c. and to have power by themselves and their agents, &c. to carry on and complete the canal; and to levy tolls thereon not exceeding 3d. per ton per mile for goods and 2d. per mile for passengers.
1789.	29 Geo. III. c. 39 -	The company incorporated by 11 & 12 Geo. III. c. 31 are regulated as to the election of directors and to the holding of general meetings, &c.
ACTS OF THE PARLIAMENT OF THE UNITED KINGDOM.		
1845.	8 & 9 Vict. c. 28 -	Canal companies empowered to vary their tolls.
	8 & 9 Vict. c. 42 -	Canal companies empowered to become carriers of goods.
1848.	11 & 12 Vict. c. 124 -	For better carrying on the affairs of the Grand Canal Company, and the company's name changed.

Over 80 -	0 8	1 2	1 6	1 8	½d. " "

The above rates include collection or delivery in Dublin.

Parcels exceeding 56 lbs. in weight are forwarded by passenger train, at 25 per cent. over goods rates when directed "Van Parcels," and delivered at the respective stations 30 minutes before the advertised time of starting.

*Small parcels.*—The following reduced rates are now charged for the carriage of parcels not exceeding 28 lbs. in weight and 5*l.* in value, subject to the under-mentioned conditions; for 50 miles and under, 6*d.*; over 50 miles and under 80, 9*d.*; over 80 miles, 1*s.*

The above rates are from station to station only, and do not include collection or delivery. The charges must be paid at the forwarding station. The parcels must be legibly endorsed "parcel under 5*l.* in value." They must be delivered at the forwarding station, half an hour before the advertised time of departure of the train, and will be subject to a charge of 1*d.* per day for storage, if not taken away by the owner within 24 hours after arrival. In cases of neglect of any of these conditions the parcels will be forwarded at the ordinary rates.

FOR ARTICLES CARRIED FROM STATION TO STATION ONLY, OR FROM JUNCTION TO JUNCTION ONLY, ON ALL YOUR LINES.

(A.) IN COMPANIES' WAGGONS, WHEN LOADED AND UNLOADED BY THE OWNERS.

2. State in the following Table the charges on your lines for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement:—

Name of Article.	(a.)			(b.)		(c.)		(d.)	
	What is the Minimum Charge per Ton for each Article for the shortest Distance?	What is the Minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 50 miles?	What is your Scale of Charges according to Distance for Distances beyond 50 Miles?	What is the Charge per Ton for Terminal or Station Accommodation?	Is it included in the foregoing Charges?	What is the Charge for Loading and Unloading when done by the Company?	Is it in addition to the foregoing Charges?
For the whole of the articles included in the MINERAL CLASS of the Clearing House classification, and also including Canal, Coal, Coke, Culm, and Materials for Road Repairs.	2s.	5 tons.	8 miles.	1d. per mile.	No such distances.	According to the distance conveyed: for 30 miles we charge 9d. terminal at each end.	Additional.	Not done by the company.	Nil.

3. Are the above mileage charges uniformly applied between all stations on your system of railways?

Yes, as a general rule, but with occasional exceptions.

4. If not, state the nature of the exceptions?

When the route per rail is circuitous we give the public the advantage, and charge only for the direct distance. Nominally, but there is little or no risk.

5. Is the traffic of this class conveyed at the owner's risk, or otherwise?

Nil.

6. If not, state in what respects you depart from this condition?

7. Do you undertake to deliver this class of traffic within a specified time?

Within 48 hours, unless otherwise arranged.

8. What time is allowed at the stations for loading and unloading this class of traffic?

24 hours.

9. What charge do you make for demurrage of waggons?

None in practice; nominally 3s. per day per waggon.

(B.) IN OWNERS' WAGGONS.

10. State, in the following Table, the charges on your own line for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement:—  
There are no owners' waggons on this company's line.

FOR THROUGH TRAFFIC, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

17. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions?

Yes.

18. Are junctions considered as stations for this class of traffic?

Yes.

19. If not, state the exceptions?

20. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

Through rates are given.

## CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

21. Have you any scale of charges applicable to contracts? If so,—  
 a. Is the charge based on a minimum annual payment, or on the quantity carried?  
 b. Or how otherwise?  
 22. Have you any special contracts independent of the foregoing scale of charges or conditions?
- None.  
 Nil.  
 Nil.  
 Occasionally for large quantities conditioned to suit economy of haulage low rates are named.

## INQUIRY No. 4.—As to Acts of Parliament authorizing Tolls and Rates.

Give a list of the Acts of Parliament now in force, under which you are authorized to levy tolls and rates on the lines included in your former return.

N.B.—Horses and carriages are not booked to or from the stations to which no rates are mentioned.

Entire horses are charged each as half a horse-box.

Hunting.—The horses of gentlemen hunting will, during the season, be conveyed at a one and a half fare for the double journey, when performed the same day. The charges must in all cases be pre-paid, or boxes cannot be ensured for the return journey.

The rates for horses and dogs mentioned are charged when the sender signs a note holding the company free from risk, otherwise an addition of 20 per cent. will be made to the above rates.

Horses and carriages may be conveyed by goods trains, at two-thirds of the above rates, but only when [*hiatus*].

**REGULATIONS FOR THE CONVEYANCE OF LIVE STOCK.**

First.—The sender may load as many in each waggon as he may think fit, but the company will not be responsible for any injury to live stock that may arise from overloading.

Second.—No less charge than half-a-waggon rate is to be made for each waggon.

Third.—The rate per half-waggon is to be charged for four head of full-grown cattle; six head of small cattle; fifteen calves, under two months old; fifteen sheep or bacon pigs; and twenty small pork pigs or lambs. All over the above numbers in each waggon to be charged at the full waggon rate.

Fourth.—When half a waggon only is charged, the company may use the other half for conveying the live stock of another owner.

Fifth.—Horses may be loaded in waggons at a reduced charge of 1½d. per head per mile, no less charge than for five, on owner signing risk note, and declaring that the horses do not exceed the value of 10l. each, minimum charge of 15s. per waggon. Horses

of a greater value will be taken only at the full ordinary rate, as by passenger trains.

Sixth.—Rams, sheep, calves, or pigs, under two months old are to be charged, per goods or cattle trains only, ½d. per mile, per head; minimum charge 2s.

Seventh.—All charges must be prepaid.

Eighth.—Drovers in charge of not less than one whole waggon of stock, and travelling in the same train with them, are to be charged half third-class fares; if in charge of less than one waggon of stock full fare will be charged according to class.

The station master at the loading station will in all cases be held responsible for the proper charges. The station master at the unloading station is to check off the numbers of waggons entered on the ticket, endorse the time of arrival at the station, see that the authorized numbers are allowed for half waggons, the proper rates charged, and report discrepancies or irregularities to the manager immediately.

Name the stations between which the highest rates for the conveyance of live stock are charged, showing the charge for each description, and the distances between the stations.

Dublin and Drogheda, 32 miles.

Name the stations between which the lowest rates for the conveyance of live stock are charged, showing the charge for each description, and the distances between the stations.

## NORTH LONDON RAILWAY.

### INQUIRY No. 1.—Questions in regard to Railway Charges.

1. Give a list of the lines to which this return refers, and state their respective lengths.

The North London Railway, which commences by a junction with the London and North-western Railway at Chalk Farm (Camden), connects with the Great Northern and Midland Railways at St. Pancras, and terminates with the East and West India Docks at Poplar, connecting by a branch with the London and Blackwall Railway near Bow, by means of which the goods traffic of the above companies is conveyed to their terminal stations at Haydon Square and Mint Street; and passenger trains are worked every 15 minutes to and from the London and Blackwall Company's station at Fenchurch Street, City.

The company also works (for the Great Eastern Company) a branch line from Hackney Wick to Stratford, there connecting their line with the Great Eastern system and the Victoria Docks; also for the London and North-western Company the Hampstead Junction line between Camden Road and Willesden Junctions, at which latter point a connexion is formed by means of the West London Railway with the Great Western and also the London and Brighton and other railways south of the Thames; also with the North and South-western Junction Railway between Willesden Junction and Kew Bridge, at which point it connects with the London and South-western Railway, by which company the trains are taken forward to Richmond, Twickenham, and Kingston-on-Thames. The length of the line from Chalk Farm to Poplar is 8½ miles, and from Bow to the Blackwall Railway half a mile.

FOR ARTICLES CARRIED FROM STATION TO STATION ONLY, OR FROM JUNCTION TO JUNCTION ONLY, ON ALL YOUR LINES.

(A.) IN COMPANIES' WAGGONS, WHEN LOADED AND UNLOADED BY THE OWNERS.

2. State in the following Table the charges on your lines for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement:—

Name of Article.	(a.)		(b.)		(c.)		(d.)		
	What is the Minimum Charge per Ton for each Article for the shortest Distance?	What is the Minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 50 Miles?	What is your Scale of Charges according to Distance for Distances beyond 50 Miles?	What is the Charge per Ton for Terminal or Station Accommodation?	It is included in the foregoing Charges?	What is the Charge for Loading and Unloading when done by the Company?	Is it in addition to the foregoing Charges?
For the whole of the articles included in the MIXED CLASS of the Clearing House Classification, and also including Cannel, Coal, Coke, Culm, and Materials for Road Repairs. Appendix C.	As regards goods traffic this line is used only as a connecting link between the larger systems of railway or to and from terminal stations the property of other companies, and any charge is included by the sending and receiving companies in the through rates, the North London Company receiving thereout a sum for toll and working expenses not calculated on mileage but varying according to the through charges, the minimum being 2s. 6d. per ton for the entire length of line and haulage to destination beyond the limits of the company's lines; the minimum charge, 3d. per ton for coal and 6d. per ton for general goods for a distance of one mile in foreign waggons.								

3. Are the above mileage charges uniformly applied between all stations on your system of railways?
4. If not, state the nature of the exceptions.
5. Is the traffic of this class conveyed at the owner's risk, or otherwise?
6. If not, state in what respects you depart from this condition.
7. Do you undertake to deliver this class of traffic within a specified time?
8. What time is allowed at the stations for loading and unloading this class of traffic?
9. What charge do you make for demurrage of waggons?

See answer to Question No. 2.

The coal traffic is conveyed at owner's risk, sender's loading, and consignee's discharging. For merchandise traffic, see remarks in answer to Question No. 2.

The company do not deliver.

Twenty-four hours for loading, and twenty-four hours for discharging.  
3s. per waggon per diem.

## (B.) IN OWNERS' WAGGONS:

10. State in the following Table the charges on your own line for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement:—

Name of Article.	(a.)			(b.)		(c.)	
	What is the Minimum Charge per Ton for each Article for the shortest Distance?	What is the Minimum Load of each Article below which you refuse to take it at these Rates?	What is the Distance to which this Charge is applicable?	What is the Charge per Ton per Mile when this Distance is exceeded, and up to 50 Miles?	What is your Scale of Charges according to Distance for Distances beyond 50 Miles?	What is the Charge per Ton for Terminal or Station Accommodation?	Is it included in the foregoing Charges?
For the whole of the articles included in the MINERAL CLASS of the Clearing House Classification, and also including Canal, Coal, Coke, Culm, and Materials for Road Repairs. Appendix CP.	<p>On inland coal there is a uniform rate of 1s. per ton, excepting to Poplar for transfer to barges, on which the charge is 9d. per ton.</p> <p>The answer to Question No. 2 refers also to merchandise traffic under this head.</p>						

## EXTRACT from the North London Company's Letter, 24th July 1866.

"I have now to inform you that there are eight depôts for reception of coal, constructed originally by the Northumberland and Durham Coal Company, and subsequently purchased by this company. Each depôt is let to a tenant who engages to take annually the quantity of coal the depôt is estimated to have accommodation for, or in default of taking the full quantity to pay the charges in respect of the full amount. The coal may be either inland or seaborne, there being no stipulation as to the places or collieries from which it is to be obtained. The inland coal is received either at Camden, the junction of the London and North-western, or at St. Pancras, the junction of the Midland and Great Northern Companies' lines. The seaborne coal is received at the North London Company's dock at Poplar. The charge for carriages is in either case 1s. per ton, a further charge of 2d. per ton being made for wharfage in the case of inland coal, the seaborne coal being subjected to dock dues of the same amount."

Newry and Armagh Railway.—Inquiry No. 2.—*continued.*

2. Are the above mileage charges uniformly applied between all stations on your system of railways?  
3. If not, state the nature of the exceptions, and give an instance of each class of exceptions?  
4. Is the traffic of articles in this return conveyed at the owner's risk, or otherwise?  
5. If not, state in what respects you depart from this condition.  
6. Do you undertake to deliver the traffic of articles in this return within a specified time?  
7. What time is allowed at the stations for loading and unloading this class of traffic?  
8. For what period do you keep any of the articles in this return in your warehouses free of charge?  
9. What charge for warehousing is made after the period has expired?  
10. What charge do you make for demurrage of waggons?

They are not.

Exceptions are caused by other companies competing for the traffic to stations on this line.

Conveyed at railway company's risk, except in special cases.

When carried by special agreement.

Yes, as a general rule.

24 hours.

24 hours.

According to class and description of goods.

3s. per day (24 hours).

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.  
12. Are junctions considered as stations for the traffic of articles in this return?  
13. If not, state the exceptions, and give an instance of each class of exception.  
14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

Yes. In return the Ulster (our neighbouring company) do not give this facility to stations on this line (Newry and Armagh), and the Dublin and Belfast company to our Newry station only.

Yes, on this line.

Receiving companies forward to nearest station on their line to destination, charging (if to pay) the sending company's charge forward as paid in, and accounting to that company for same.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—  
a. Is the charge based on a minimum annual payment, or on the quantity carried?  
b. Or how otherwise?  
16. Have you any special contracts independent of the foregoing scale of charges or conditions?  
17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.  
18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.  
19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars.

No.

Yes.

Yes.

Yes.

No.

Dublin and Belfast Junction Railway.—Inquiry No. 1.—*continued.*

3. Are the above mileage charges uniformly applied between all stations on your system of railways? Generally they are.
4. If not, state the nature of the exceptions? When there are two routes the public have the advantage of being charged for the shortest.
5. Is the traffic of this class conveyed at the owner's risk, or otherwise? Nominally at owner's risk, but there is little risk in carrying this class of traffic.
6. If not, state in what respects you depart from this condition? Nil.
7. Do you undertake to deliver this class of traffic within a specified time? Within 48 hours, unless there is some arrangement to suit circumstances.
8. What time is allowed at the stations for loading and unloading this class of traffic? One day for loading, two days for unloading.
9. What charge do you make for demurrage of waggons? 3s. per day is the charge, but it is seldom enforced.

## (B.) IN OWNERS' WAGGONS.

10. State, in the following Table, the charge on your own line for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement.

No traffic in owners' waggons.

## FOR THROUGH TRAFFIC, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

17. Do you make through charges for this class of traffic with all other Railway Companies connected with your system by junctions? Yes.
18. Are junctions considered as stations for this class of traffic? Yes.
19. If not, state the exceptions?
20. What arrangements are made for the interchange of traffic with other companies, when through charges are not given? The local rates are charged, and the waggons allowed to go through.

## CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

21. Have you any scale of charges applicable to contracts? If so,— No.
- a. Is the charge based on a minimum annual payment, or on the quantity carried?
- b. Or how otherwise?
22. Have you any special contracts independent of the foregoing scale of charges or conditions? For large quantities of goods arrangements are at times made to take them at lower rates.

## INQUIRY No. 4.—As to Acts of Parliament authorizing Tolls and Rates.

Give a list of the Acts of Parliament now in force, under which you are authorized to levy tolls and rates on the lines included in your former return.

Dublin and Meath Railway.—Inquiry No. 1.—*continued.*

3. Are the above mileage charges uniformly applied between all stations on your system of Railways?

4. If not, state the nature of the exceptions?

5. Is the traffic of this class conveyed at the owner's risk, or otherwise?

6. If not, state in what respects you depart from this condition?

7. Do you undertake to deliver this class of traffic within a specified time?

8. What time is allowed at the stations for loading and unloading this class of traffic?

9. What charge do you make for demurrage of waggons?
- Yes; as nearly as possible.

Coals are carried in most cases at very little beyond 1d. a mile a ton.  
At the owner's risk.

No departure.

No specific understanding, but as a rule we deliver nearly with as great regularity as if ordinary goods.  
24 hours; but a much longer space is allowed in practice.

3s. a day; but in no case exacted up to this date.

(B.) IN OWNERS' WAGGONS.

10. State, in the following table, the charges on your own line for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement:—  
No traffic carried in owners' waggons.

FOR THROUGH TRAFFIC, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

17. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions?

18. Are junctions considered as stations for this class of traffic?

19. If not, state the exceptions?

20. What arrangements are made for the interchange of traffic with other companies when through charges are not given?
- Yes.

No.

CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

21. Have you any scale of charges applicable to contracts? If so,—  
a. Is the charge based on a minimum annual payment, or on the quantity carried?  
b. Or how otherwise?

22. Have you any special contracts independent of the foregoing scale of charges or conditions?
- On coal.

## GENERAL REMARKS.

The districts traversed by these railways are almost exclusively agricultural. There is very little manufacture, and very little mineral traffic.

3. Are the above mileage charges uniformly applied between all stations on your system of railways?

Yes, as near as may be.

4. If not, state the nature of the exceptions?

5. Is the traffic of this class conveyed at the owner's risk, or otherwise?

At owner's risk, except in the case of manufactured salt.

6. If not, state in what respects you depart from this condition?

7. Do you undertake to deliver this class of traffic within a specified time?

We undertake to convey it in the railway in reasonable time, but not to collect or deliver it to or from the station.

8. What time is allowed at the station for loading and unloading this class of traffic?

No limit is, in practice, made.

9. What charge do you make for demurrage of waggons?

We have never as yet charged demurrage.

## (B.) IN OWNERS' WAGGONS.

10. State in the following Table, the charges on your own line for the conveyance of the various articles named, in tons of 2,240 lbs., or the equivalent measurement:—

All goods are conveyed in waggons belonging to the railway company.

## FOR THROUGH TRAFFIC, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

17. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions?

Yes.

18. Are junctions considered as stations for this class of traffic?

All our junctions with other lines are situate at stations.

19. If not, state the exceptions.

20. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

## CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

21. Have you any scale of charges applicable to contracts? If so,—

No.

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

22. Have you any special contracts independent of the foregoing scale of charges or conditions?

No.

- Are the above mileage charges uniformly applied between all stations on your system of railways?
- If not, state the nature of the exceptions, and give an instance of each class of exceptions.
- Is the traffic of articles in this return conveyed at the owner's risk, or otherwise?
- If not, state in what respects you depart from this condition.
- Do you undertake to deliver the traffic of articles in this return within a specified time?
- What time is allowed at the stations for loading and unloading this class of traffic?
- For what period do you keep any of the articles in this return in your warehouses free of charge?
- What charge for warehousing is made after the period has expired?
- What charge do you make for demurrage of waggons?

The rates given do not apply uniformly between all stations on this line, but are modified to suit the exigencies of the traffic.

At owner's risk.

The Company do not undertake to deliver the traffic within a specified time, but use all proper diligence in the conveyance of it.

The traffic is usually loaded and unloaded by the Company. If unloaded by consignees the trucks must be discharged within 24 hours after advice of their arrival.

None charged.

3s. per day.

Brecon and Merthyr Tydvil Railway.—Inquiry No. 2.—continued.

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions.

12. Are junctions considered as stations for the traffic of articles in this return?

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?
- Yes, with all companies.

Yes.

See reply to question 12.

If traffic is delivered to this Company for a station with which there are no through rates it is invoiced to the nearest point to that station and thence charged forward.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

16. Have you any special contracts independent of the foregoing scale of charges or conditions?

17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars.
- No.

See reply above.

No.

No; all through rates are noted by all competing routes at the same figures. For instance, the rates from Brecon to Sheffield are noted via Hereford, Salop, and Crewe, Hereford, Salop, and Chester, Hereford and Worcester; Three Cocks, Llanidloes, and Whitechurch, and Three Cocks, Llanidloes, and Oswestry.

See reply to question 17.

Timber is sometimes loaded in return coal waggons; the other traffic is usually loaded in company's waggons.

GENERAL REMARKS.

The line is not at present opened for continuous traffic for more than 49 miles between any two points, and the questions as to rates for upwards of 50 miles cannot therefore be answered.

For loading and unloading timber a charge of 2s. 6d. per ton (1s. 3d. at each end) is made in addition to the charges given in the foregoing return.

## INQUIRY No. 6.—As to Rates for Parcels.

Give, in reference to the lines included in your former returns, the general rates charged for parcel traffic, both by passenger and goods trains, according to weight and distance.

Also add particulars of any important exceptions made to these general rules.

The following will give all particulars.

The rates named apply to our local as well as to foreign traffic.

## PARCELS AND OTHER TRAFFIC BY PASSENGER TRAINS.

The following arrangements will come into operation on receipt.

Rates for the carriage of parcels between stations on the above lines and between these stations and those on the London and North-western and Great Western Railways.

PARCELS.

FOR INSURANCE.

The following regulations to be observed :—In pursuance of an Act of Parliament, passed in the first year of the reign of His Majesty King William IV., cap. 68, entitled, “An Act for the more Effectual Protection of Mail Contractors Stage Coach Proprietors, and other Common Carriers for hire, against the loss of or injury to Parcels or Packages delivered to them for conveyance or custody, the value and contents of which shall not be declared to them by the owners thereof.

That for any package or passengers’ luggage containing “Gold or silver coin of this realm, or of any foreign State, or any gold or silver in a manufactured or unmanufactured state, or any precious stones, jewellery, watches, clocks, or time-pieces of any description, trinkets, bills notes of the governor and company of the banks of England, Scotland, and Ireland respectively, or of any other bank in Great Britain or Ireland; orders, notes, or securities for payment of money, English or foreign, stamps, maps, writings, title deeds, paintings, engravings, pictures, gold or silver plate, or plated articles, glass, china, silk, in a manufactured or unmanufactured state, and whether wrought up or not wrought up with other materials, furs or lace, or any of them,” to a greater amount in value than ten pounds, the increased rates of charge, over and above the common and ordinary rates of charge for carriage, are as follows :—

For any distance not exceeding	For each pound sterling in value the sum of
50 miles - - - - -	- - - - - One halfpenny.
75 miles - - - - -	- - - - - Three farthings.
100 miles - - - - -	- - - - - One penny.
150 miles - - - - -	- - - - - Three halfpence.

An additional farthing per pound sterling for every increase of distance not exceeding 50 miles, and the same for every increase of distance upon each additional 50 miles completed, over and above the first 150 miles.

When the value of the property to be insured shall exceed 250*l.*, a reduction in the above specified rates may be made by special contract.

The conveyance by passenger trains of aquafortis, gunpowder, oil of vitriol, lucifer matches, or any other goods, which, in the judgment of the Companies, may be considered dangerous, is peremptorily forbidden; and any person sending or causing to be sent, any such article or articles, is liable to a penalty of 20*l.*, which will be sued for under the powers of the Companies’ Acts.

When a parcel is insured, both the insurance and the carriage must be prepaid.

CARRIAGE OF NEWSPAPERS.

For the conveyance from London of newspapers and periodicals published at intervals not exceeding seven days, the following rates will be charged, viz :—

One newspaper or other periodical daily	- - - 21 <i>s.</i> 0 <i>d.</i> per annum.
For each additional newspaper enclosed in the same parcel	- 10 <i>s.</i> 6 <i>d.</i> „

For six months or any shorter period, half the above rates will be charged, and for any period between six and twelve months, the same charge will be made as for a year. These rates must be paid in advance.

Parcels containing papers and periodicals, published at intervals not exceeding seven days, will be charged half the ordinary parcel rates between station and station, but no collection or delivery will be paid for or performed by the Company, nor a less amount than 4*d.* charged for a single parcel. Prepayment of these parcels is optional.

CARRIAGE OF PROVINCIAL NEWSPAPERS.

All newspaper parcels carried at the above rates must be prepaid by the sender affixing a label or labels representing the amount of carriage, according to the foregoing scale.

The clerks at the forwarding and receiving stations must weigh the packages and check the labels which have been affixed. Full parcel rates to be charged for any insufficiently stamped.

The clerk at the forwarding station must deface the labels, and the receiving clerk is to examine every parcel, and any labels which have not been cancelled must be effectually obliterated before the parcel is taken from the station.

Brecon and Merthyr Tydvil Railway.—Inquiry No. 6.—*continued.*

The above rates are from station to station only, and do not include either collection or delivery.  
Receipts are not to be given for newspaper parcels.  
Labels in quantities of not less than 10s. worth may be obtained on application to the audit office.

## PERIODICALS, &amp;c.

Periodicals and all other printed unbound matter, published in the provinces, must be made up in parcels open at both ends, and booked as ordinary parcels, and charged at the undermentioned rates, but in no instance must the charge be less than the rate for newspapers, as shown above.

These rates include collection and delivery.

Labels must not be used for parcels of periodicals or other unbound matter.

Parcels of newspapers and periodicals intended to be sent by any particular train must be at the parcels office ten minutes before the departure of such train for the purpose of registration. If, however, this cannot at all times be complied with, and parcels should arrive a little after the time specified, every exertion is to be made by the parcels clerk to forward them.

The station clerk is authorised to open any parcel of newspapers, periodicals, &c., if he has good reason to suppose that these regulations are infringed. Any violation is to be reported, and the parcel in the meantime forwarded to its destination.

Newspapers, parcels and periodicals to be charged according to the distance by the shortest route, and when any calculation results in a fraction of a penny, the whole penny is to be charged.

Parcels of newspapers and periodicals from London are not included in this arrangement.

## MONEY PARCELS.

The Companies will not, under any circumstances, hold themselves responsible for money enclosed in parcels conveyed upon the railways, unless the fact be declared at the time when the parcel is booked, and the words "Money Parcel" written on the outside thereof, and the extra rate prepaid. If the amount enclosed shall exceed 10l. an insurance will be required to be paid, in addition to the ordinary charge according to the foregoing scale.

## BULLION.

The ordinary parcel and insurance rates must be applied. Gold and silver plate to be also charged the ordinary parcels and insurance rates.

## FISH.

Packages of fish consigned to dealers to be charged one-half the ordinary parcel rates. No less charge than for a light parcel exceeding 8 lbs.

## ICE.

Consignments of ice to be carried at one half the ordinary rates, but no less charge is to be made than for a light parcel exceeding 8 lbs.

Only half the rates quoted are charged when perambulators are accompanied by passengers.

## INVALID OR BATH CHAIRS FOR ADULTS.

To be double the rate of perambulators.

## SMALL ANIMALS.

Rams.—A charge of 1d. per mile each ram to be made, and no less charge than 2s. per ram.

Sheep, calves, pigs, and other small animals, except dogs and rams, to be charged as follows, viz.:—Each animal up to 56 lbs. in weight, same as for two dogs. Each animal above 56 lbs. in weight, half parcels rates, but no less charge than as for two dogs.

## ENTIRE HORSES.

If owners require horses (entire or otherwise) to be loaded in separate boxes, then they must pay the charge for two stalls.

## HUNTERS' HORSES.

Return tickets may be issued to huntsmen for their horses, available for return the same day from the same station to which the ticket is issued at one fare and a half.

Brecon and Merthyr Tydvil Railway.—Inquiry No. 6.—*continued.*

The 'Taff Vale Railway is not a "passenger railway" within the meaning of the Act of Parliament.

Places between which the highest rate of passenger fare is charged, giving the fares for each class and the distances between the stations.

All our passenger fares are uniform.

Places between which the lowest rate of passenger fare is charged, giving the fares for each class and the distances between the stations.

All our passenger fares are uniform.

Are market tickets issued? If so, between what places, and at what proportion of the single fares?

None issued.

Give the average speeds of trains as follows :—

Average speed of express trains, including stoppages -	-	-	-	-
ordinary passenger trains "	-	-	-	25 miles per hour.
parliamentary "	-	-	-	-

Give some general information as to the nature and extent of your special excursion traffic, stating the frequency of the excursion trains; the places between which they run; the fares charged per mile for each class; the number of passengers of each class generally carried in each train; and the average speed, including stoppages.

We seldom run excursion trains specially, but mostly meet parties who have some special object by allowing them to travel the to and fro journey at a single fare or a fare and a half, as the case may be.

Last summer we ran a lot of school children from Merthyr to Llantrissant and back at 6d. a head.

We also once ran a special train for a British school committee, who paid us 50l. for the train, and issued their own tickets.

The speed of these trains is the same as our ordinary passenger trains.

**INQUIRY No. 6.—As to Rates for Parcels.**

Give, in reference to the lines included in your former returns, the general rates charged for parcel traffic, both by passenger and goods trains, according to weight and distance.

Also add particulars of any important exceptions made to these general rates.

2. Are the above mileage charges uniformly applied between all stations on your system of railways?

Yes.

3. If not, state the nature of the exceptions and give an instance of each class of exceptions.

4. Is the traffic of articles in this return conveyed at the owner's risk or otherwise?

All at company's risk.

5. If not, state in what respects you depart from this condition.

6. Do you undertake to deliver the traffic of articles in this return within a specified time?

No.

7. What time is allowed at the stations for loading and unloading this class of traffic?

One clear day.

8. For what period do you keep any of the articles in this return in your warehouses free of charge?

No fixed period; seldom or ever make any charge for temporary accommodation.

9. What charge for warehousing is made after the period has expired?

10. What charge do you make for demurrage of waggon?

Three shillings per day.

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions and give an instance of each class of exceptions.

Yes.

12. Are junctions considered as stations for the traffic of articles in this return?

The one junction of this company is so considered.

13. If not, state the exceptions and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies when through charges are not given?

All traffic with other lines carried at through rates.

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts? If so,—

None.

a. Is the charge based on a minimum annual payment or on the quantity carried?

b. Or how otherwise?

Vale of Clwyd Railway.—Inquiry No. 2.—*continued.*

16. Have you any special contracts independent of the foregoing scale of charges or conditions? None.

17. Is the traffic in all cases sent by the shortest railway route in connection with your system of railways? If not, state the exceptions and give an instance of each class of exceptions.

Where we have two routes the traffic is sent as consigned, the shortest route ruling the rates.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply.

19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars. No.

## GENERAL REMARKS.

The length of this line is only 10 miles, and the articles produced in the district (agricultural) are very few, the traffic being almost entirely imports. These again are all carried at through rates, and the returns of other companies, the London and North Western for instance, whose rates this company adopt generally, will give all the required information. We have, nevertheless, given the rates and charges of the articles we are constantly carrying in connection with other companies.

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply. }
19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars. No.

GENERAL REMARKS.

The length of this line is only 10 miles, and the articles produced in the district (agricultural) are very few, the traffic being almost entirely imports. These again are all carried at through rates, and the returns of other companies, the London and North Western, for instance, whose rates this company adopt generally, will give all the required information. We have, nevertheless, given the rates and charges of the articles we are constantly carrying in connection with other companies.

INQUIRY No. 4.—As to Acts of Parliament authorizing Tolls and Rates.

Wharfage—For all goods loaded or unloaded (excepting coals, dross, ironstone, limestone, and pig iron), at any wharf or basin. - - - - 1d.

NOTICE.

The Company do not undertake or profess to supply engine power or waggons on all occasions, but only when their arrangements will permit.

Fractions of tons or miles to be charged as by Act.—Trucks and waggons, when off this Company's line, to be charged for by special agreement; and when used upon private branches, to be charged 1d. per ton for the first mile, and a ¼d. per ton for every half mile, or fraction thereof, thereafter.

Demurrage on Waggons.—In addition to the ordinary carriage dues, the sum of 1s. 6d. for and in respect of every 24 hours' (or any part of 24 hours') detention that may occur, after the expiry of 12 hours from the arrival of the waggons at their destination will be regularly charged. Parties taking waggons into their lyes, and allowing them to be loaded, or remain there unloaded, also subject themselves to this charge.

Any trader who is desirous to save the above charges, can make arrangements for providing waggons for his own use, as he cannot without payment of the charges, be allowed to make use of the Company's waggons.

All dues are payable to the Company's collectors, at their respective offices, on the delivery of the traffic.

- 10d. Do the charges include returning empty waggons? Yes.  
11. Are the above charges uniformly applied between all stations on your system of railways? Nearly so.  
12. If not, state the nature of the exceptions? Exception, occasionally made by reducing the charges for long distances, or to enable traders to compete.  
13. Is the traffic of this class conveyed at owner's risk. At owner's risk.  
14. Do you undertake to convey this class of traffic within a specified time? No.  
15. And to return the empty waggons within a specified time? No.  
And if so, in what time?  
16. Do you allow demurrage on owners' waggons when not returned within the specified time? No.

Monkland Railway.—Inquiry No. 1.—continued.

FOR THOUGH TRAFFIC, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

17. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions?

Yes generally, but not invariably.
18. Are junctions considered as stations for this class of traffic?

If this question means "Are all junctions considered as " stations affording public accommodation to take traffic to " or from them,"—the answer is, No.
19. If not, state the exceptions?

Because, where the junction is constructed merely for interchange of traffic between two or more railways, it may be at a place where there is no public road yielding access thereto.
20. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

The Monkland Railway Company forwards the traffic over its own railway to or from the junction, charging its own dues to the person for whom the traffic is carried.

CONTRACT CHARGES, WHETHER IN COMPANIES' OR IN OWNERS' WAGGONS.

21. Have you any scale of charges applicable to con- tracts? If so,—

a. Is the charge based on a minimum annual pay- ment, or on the quantity carried?

No.

b. Or how otherwise?
22. Have you any special contracts independent of the foregoing scale of charges or conditions?

None.

FOR THROUGH TRAFFIC.

11. Do you make through charges for this class of traffic with all other railway companies connected with your system by junctions? If not, state the exceptions, and give an instance of each class of exceptions?

We make through charges with all railways in connection, but we do not book to stations south of London.

12. Are junctions considered as stations for the traffic of articles in this return?

Yes.

13. If not, state the exceptions, and give an instance of each class of exception.

14. What arrangements are made for the interchange of traffic with other companies, when through charges are not given?

We book locally to our terminals, and hand over the goods with charges to next company,

GENERAL QUESTIONS.

15. Have you any scale of charges applicable to contracts, If so,—

No.

a. Is the charge based on a minimum annual payment, or on the quantity carried?

b. Or how otherwise?

16. Have you any special contracts independent of the foregoing scale of charges or condition?

No.

17. Is the traffic in all cases sent by the shortest railway route in connexion with your system of railways? If not, state the exceptions, and give an instance of each class of exceptions?

Not in all cases. We book to London and other stations in England by east and west coast routes, although there is a difference of distance.

Scottish North-eastern Railway.—Inquiry No. 5.—*continued*

18. Do the mileage rates apply to the shortest railway route? If not, state to what distance they apply. Yes, to the shortest route.
19. Are any articles in this class ever carried in owner's waggons? If so, state the particulars. No.
